Detailed school reports

How to read the tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their students should seek to confirm the *Report Card*'s findings by visiting the school and interviewing teachers, school administrators, and other parents. And, of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. More information regarding schools may be found on the Alberta Education website at <http://ednet.edc.gov.ab.ca/k_12/> and on the websites of local school authorities.

IMPORTANT: In order to get the most from the Report Card, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

A – **GEOGRAPHICAL AREA**

– Q

A Each of the schools in the *Report Card* has been assigned to a geographical area based on the city or town in which the school is located. Grouping schools in these geographical areas makes it easier to compare them. Within each geographical area, the schools are arranged alphabetically.

To find a school's results, find its city or town in the List of cities and geographical areas and note the area in which the city is located. Find the page upon which each geographical areas results begin by referring to the Index of geographical areas.

B The number of students enrolled in grade 6 in the spring of 2008. Indicator results for small schools tend to be more variable than those for larger schools and caution should be used in interpreting the results for smaller schools.

C ESL (%); Special needs (%); French Immersion (%). These statistics report the percentage of the

students for whom English is a second-language; the percentage of students with special needs; and the percentage of students registered in French Immersion programs. When you want to compare academic results, these statistics can be used to find other schools where the student body has similar characteristics.

D The average parental employment income in student families. Higher values of this statistic are commonly thought to be associated with better student performance. Use this statistic to identify schools at which the students share similar family backgrounds.

E The school's overall academic rank in the province for 2007/2008 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the province. A high ranking over five years indicates consistently strong results at the school.

F to I The average mark (%) achieved by the students on the grade-3 and grade-6 provincial achievement tests in language arts and mathematics. Note that all the academic performance indicators—except the 3-year value added indicators and the Overall rating out of 10—are expressed as percentage points.

J & K The difference (in percentage points) between boys and girls in their average marks on the grade-6 language-arts and mathematics achievement tests. Where the difference favours the girls the value is preceded by an F. Where boys are favoured, the value is preceded by an M. An E means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students.

L The percentage of all the grade-3 and grade-6 achievement tests in language arts and mathematics written by students at the school that were below the acceptable standard.

M The percentage of the tests that could have been completed by the school's students but were not assigned a score. The *Tests not written* percentage takes into account tests not completed due to students' absence; because students were excused from writing the test by the superintendent; or where students' results were withheld because, for instance, they retired during the test sitting due to illness or they were found to have cheated. Note that schools that administer these tests are expected to ensure that all their students participate. For this reason, you should take note of the *Tests not written* percentage when you consider each school's results on the *Report Card*. The principal of a school with a high *Tests not written* percentage should be able to provide good reasons for the students' failure to complete the tests.

N & O These are estimates of the school's contribution to its students' results on the grade-6 language-arts and mathematics achievement tests. Schools that have a strong positive impact on their students receive an A for this indicator. Those that receive a B or a C may have some positive impact on their students. Schools that have little impact receive a D.

P The *Overall rating out of 10* takes into account the seven indicators described in rows F through L above to answer the question, "In general, how is the school doing academically compared to other schools in the province?"

Q An upward pointing arrow (▲) at the end of an indicator row means that the school is probably improving on that indicator. A downward pointing arrow (▼) means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash indicates that there is no significant change. Where insufficient data were available, "n/a" appears in the column. Note that for Percentage of tests failed, Tests not written, and the two Gender gap indicators, a downward trend in the data will lead to an upward

pointing arrow (▲) in the trend column. For example, a decreasing Percentage of tests failed indicates improvement and so an upward pointing arrow (▲) is displayed.

Other notes

Note 1

Not all the province's elementary schools are included in the tables or the ranking. Of all the schools in the province reporting results for the achievement tests, 715 are included in this *Report Card*. In some school districts and divisions that operate middle schools or junior high schools, the elementary schools may not enroll students in grade 6. Since the *Report Card* is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included.

In addition, schools at which fewer than 15 students were enrolled in either grade 3 or grade 6 are excluded, as are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10* for the school year 2007/2008.

Note 2

In accordance with its regulations regarding the privacy of personal information, where school results involved less than six students, Alberta Education provided no data. Alberta Education has also refused to provide test results data from federally-funded, First-Nations, on-reserve schools.

Note 3

Due to continuing improvements in methodology, some historical values for indicators and overall ratings may differ from those previously reported.

Note 4

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, "n/a" appears in the tables.

Note 5

You can compare a school's results with the all-schools average results below.

Note 6

If you have questions about the *Report Card on Alberta's Elementary Schools*, contact Peter Cowley, Director of School Performance Studies at The Fraser Institute at 604.714.4556.
