Studies in Education Policy are published periodically throughout the year by The Fraser Institute.

Our vision is a free and prosperous world where individuals benefit from greater choice, competitive markets, and personal responsibility. Our mission is to measure, study, and communicate the impact of competitive markets and government interventions on the welfare of individuals.

Founded in 1974, we are an independent research and educational organization with offices in Calgary, Montréal, Tampa, Toronto, and Vancouver, and international partners in over 70 countries. Our work is financed by tax-deductible contributions from thousands of individuals, organizations, and foundations. In order to protect its independence, the Institute does not accept grants from government or contracts for research.

To order additional copies of Studies in Education Policy, any of our other publications, or a catalogue of the Institute's publications, please contact the publications coordinator via our toll-free order line: 1.800.665.3558, ext. 580; via telephone: 604.688.0221, ext. 580; via fax: 604.688.8539; via e-mail: sales@fraserinstitute.ca.

For media enquiries, please contact our Communications department via telephone: 604.714.4582; via e-mail: communications@fraserinstitute.ca. To learn more about the Institute, please visit our web site at <http://www.fraserinstitute.org>.

Introduction

The *Report Card on Alberta's Elementary Schools: 2008 Edition* (hereafter, *Report Card*) reports a variety of relevant, objective indicators of school performance. These indicators are used to calculate an overall rating for each school. On the basis of this rating, the schools are ranked. The *Report Card* brings all of this information together in one easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their school.

The *Report Card* can help parents choose

In Alberta, many parents enjoy considerable choice regarding the school in which they will enroll their children. Where choice is available, the *Report Card* provides a valuable decision-making tool. Because it makes comparisons easy, the *Report Card* alerts parents to nearby schools that appear to have more effective academic programs. Further, parents can determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they interview the principal and teachers at the schools they are considering.

Of course, the choice of a school should not be made solely on the basis of a single source of information. Families choosing a school for their students should seek to confirm the *Report Card's* findings by visiting the school and interviewing teachers and school administrators. Websites maintained by the provincial ministry of education and local school

boards may also provide useful information.¹ Parents who already have a child enrolled at the school provide another point of view.

The *Report Card* provides a detailed picture of each school's academic outcomes that is not easily available elsewhere. Naturally, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

The *Report Card* facilitates school improvement

Certainly, the act of publicly rating and ranking schools attracts attention. Schools that perform well or show consistent improvement are applauded. The results of poorly performing schools generate concern, as do those of schools whose performance is deteriorating. This inevitable attention provides an incentive for all those connected with a school to focus on student results.

Some schools do better than others

Knowing that a school's results require improvement is the first step. However, to improve a school, one must believe that improvement is achievable. This *Report Card* provides evidence about what can be accomplished. It demonstrates clearly that, even when we take into account factors such as the students' family background, some schools do better than others. This finding confirms the results of research carried out in other countries.² It will come as no great surprise to experienced parents and educators that the data consistently suggest that what goes on

in the schools makes a difference to academic results and that some schools make more of a difference than others.

Comparisons are at the heart of the improvement process

Many elementary-school authorities in Alberta provide students and their parents with report cards that include both the student's mark and the median mark for each subject in which the student is enrolled. The report cards also show any marks awarded to the student earlier in the year. Comparative and historical data like these enable students and parents to see a clearer picture of an individual student's progress. By comparing a school's results with those of neighbouring schools or of schools with similar school and student characteristics, we can identify more successful schools and learn from them. By comparing a school's latest results with those of earlier years, we can see if the school is improving. Reference to overall provincial results places an individual school's level of achievement in a broader context.

There is great benefit in identifying schools that are particularly effective. By studying the techniques used in schools where students are successful, less effective schools may find ways to improve. This advantage is not lost on the United Kingdom's Department of Education and Skills. Its Leading Edge program³ helps educators connect with others who have expertise in particular areas of instruction and school administration.

Comparisons are at the heart of improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card's* indicators, ratings, and rankings.

You can contribute to the development of the *Report Card*

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please call Peter Cowley, Director of School Performance Studies, at 604.714.4556.

A measure of academic effectiveness for schools

The foundation of the *Report Card* is an overall rating of each school's academic performance. Building on data about student results provided by Alberta Education (the provincial ministry of education), we rate each school on a scale from zero to 10. We base our overall rating of each school's academic performance on seven indicators:

- (1) average achievement-test marks (percent) in grade-3 language arts;
- (2) average achievement-test marks (percent) in grade-3 mathematics;
- (3) average achievement-test marks (percent) in grade-6 language arts;
- (4) average achievement-test marks (percent) in grade-6 mathematics;
- (5) the percentage of achievement tests in (1) to (4) where the results were below the acceptable standard;
- (6) the difference between male and female students in their average achievement-test mark in grade-6 language arts;
- (7) the difference between male and female students in their average achievement-test mark in grade-6 mathematics.

We have selected this set of indicators as they provide systematic insight into a school's performance: because they are based on annually generated data, we can assess not only each school's performance in a year but also its improvement or deterioration over time.

Indicators of effective teaching

Average achievement-test marks

These indicators (in the tables *Avg test mark*) report the average percentage achieved by a school's students on the uniform achievement tests in two core subject areas. For each school, each indicator is the average score (expressed as a percentage) achieved by all of the school's students who completed the tests in language arts and mathematics at the grade-3 and grade-6 levels.

Fundamental to the mission of elementary schools is teaching its students sound basic skills in reading, writing, and mathematics. Basic literacy and numeracy are essential building blocks for life-long learning. The tests upon which the *Report Card* is based assess students on these dimensions. Examinations are designed to achieve a distribution of results reflecting the differences in students' mastery of this course work. Differences among students in abilities, motivation, and work-habits will inevitably have some impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on the achievement tests. There is also variation within schools in the results obtained in different subject areas. Such differences in outcomes cannot be wholly explained by the individual and family characteristics of the school's students. It seems reasonable, therefore, to include the average test marks in these two critical subject areas as indicators of effective teaching.

Percentage of achievement tests failed

For each school, this indicator (in the tables *Percentage*

of tests failed) provides the rate of failure (as a percentage) on the achievement tests. It was derived by dividing the sum of all the above achievement tests written by the school's students where the score was below the acceptable standard by the total number of such tests written by those students.

Since reading and mathematics are critical to students' further intellectual and personal development, students should, at the minimum, be able to demonstrate that they meet the acceptable standard of performance for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take differences among students into account?

The Gender gap indicators

Undoubtedly, the personal characteristics of students can influence the way that they learn. Successful teachers will take into account these characteristics as they develop and implement their lesson plans and teaching strategies. The extent to which a school's teachers succeed in this task can be measured by comparing the results of two different groups of students known to exhibit differences in their learning patterns and academic results.⁴

The relative academic success of boys and girls is a subject of considerable interest in the education establishment as evidenced by the near universal collection of student results data for these two groups of students by ministries of education. The *Report Card* uses these data to construct the *Gender gap* indicators.

The *Gender gap* indicators measure the difference, if any, between boys and girls in their average marks on achievement tests in grade-6 language arts and mathematics. The indicators report the size of the difference and the more successful sex.

In general, how is the school doing, academically? The Overall rating out of 10

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance, we need an overall indicator of school performance (in the tables *Overall rating out of 10*). Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall school rating. The overall rating of school performance answers the question, "In general, how is the school doing academically compared to other schools in the province?"

To derive this rating, the results for each of the indicators, for each school year, were first standardized. Standardization is a statistical procedure whereby sets of raw data with different characteristics are converted into sets of values with "standard" statistical properties. Standardized values can readily be combined and compared.

The standardized data were then combined where required to produce seven standardized scores—one for each indicator—for each school, for each year. The seven standardized scores were weighted and combined to produce an overall standardized score. Finally, this score was converted into an overall rating out of 10. It is from this *Overall rating out of 10* that the school's provincial rank is determined. For schools where only boys or girls were enrolled, there are, of course, no results for the *Gender gap* indicators. In these cases the *Overall rating* is derived using the remaining five indicators. (See Appendix 1 for an explanation of the calculation of the *Overall rating out of 10*.)

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating*, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

Other indicators of school performance

The *Report Card* includes other indicators that, while they are not used to derive the *Overall rating out of 10*, add more information on the school's effectiveness.

The *Tests not written* indicator

The uniform achievement tests provide objective measures of how each student is progressing in important basic subject areas. Such feedback is important to students and parents. It is also important to teachers, school administrators, and taxpayers, for whom the test results are an indication of the extent to which the schools have successfully discharged their responsibilities.

Alberta Learning requires that all students who are able to write these tests do so. The *Tests not written* indicator calculates the percentage of the tests that could have been completed by the school's students but which were not assigned a score. Such non-participation results when students are excused from the tests, are absent for some part of the tests, or do not complete the test to the extent necessary to score it. Thus, this indicator assesses the extent to which each school takes full advantage of the uniform achievement tests as useful measurements of student achievement.

The *Trend* indicator

Is the school improving academically? The *Report Card* provides seven years of data for most schools. Unlike a simple snapshot of one year's results, this historical record provides evidence of change (or lack thereof) over time. To detect trends in the perfor-

mance indicators, we developed the *Trend* indicator. This indicator uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. To calculate the trends, the standardized scores rather than raw data are used. Standardizing makes historical data more comparable and the trend measurement more reliable. Because calculation of trends is uncertain when only a small number of data points is available, a trend is indicated only in those circumstances where five years of data are available and where the trend is statistically significant. For this indicator, we have defined the term "statistically significant" to mean that, nine times out of 10, the trend that is noted is real; that is, it did not happen just by chance.

The socio-economic indicator

Educators can and should take into account the abilities, interests, and backgrounds of their students when they design lesson plans and teach the curriculum. By doing so, they can overcome disadvantages that their students may have. The socio-economic indicator enables us to identify schools that are roughly similar to each other with respect to the home background of their students so that their results can be compared. Effective schools produce good results regardless of the family background of their students.

For this edition of the *Report Card*, we use the *Parents' average education (yrs)* as the socio-economic indicator. This indicator is calculated using data provided by Alberta Education that shows the number of students enrolled at the school who live in each of the province's census dissemination areas. It also uses

data from the 2001 census, provided by Statistics Canada, that reports values for a variety of family and parental characteristics for families in each of the province's dissemination areas that include at least one child of elementary-school age at the date of the 2001 census.

Previous studies⁵ have shown that variations in student results from school to school cannot be accounted for solely by the personal and family characteristics of its students. Many other factors—including good teaching, counselling, and school administration—contribute to the effectiveness of schools. Indicators like *Parents' average education (yrs)* describe past relationships between a socio-economic characteristic and a measure of school effectiveness. It should not be inferred that these relationships will, or should, remain static. The more effectively schools enable all their students to succeed, the weaker will be the relationship between the home characteristics of students and their academic success. Thus, this socio-economic indicator should not be used as an excuse for poor school performance.

Indicators of student characteristics and programs

This edition of the *Report Card* includes three indicators that provide more information about the students that the school serves. The alternative French program indicator (in the tables *Alt. French (%)*) reports the proportion of the school's students who are registered in French immersion or other French languages programs. This indicator does not include core French or Francophone programs. The English as a second language indicator (in the tables *ESL (%)*) reports the proportion of the school's students who are registered in ESL programs. Finally, the special needs indicator (in the tables *Special needs (%)*) reports the proportion of the school's students who have identified special needs. This indicator excludes gifted students. These indicators provide useful information that readers can use to compare the results at schools serving students with similar characteristics.

The Value-added indicators

Value-added measures are designed to show whether a school is having a positive effect on its students over a period of time. That is, does what happens in school—teaching, counselling, encouragement, and the like—really matter? Do students succeed, at least partly, because of the quality of the school or is it simply that the bright children of well-educated, highly motivated, parents do relatively better than all the rest. One way to measure the effect of the school is to estimate how much of a given school result is due to the personal characteristics of the students and to their families' characteristics and then to assume that the remainder is due to school effects.

In the *Report Card on Quebec's Secondary Schools: 2002 Edition*,⁶ Professor Richard Marceau, co-author of the *Report Card*, developed a technique to isolate the schools' effect on the *Report Card's Overall rating* indicator.⁷ His analysis used the employment income of the parents to capture family characteristics and the proportion of students entering the Secondary IV level (the equivalent of Alberta's grade 10) who were older than expected (16 years old or more) to capture the influence of individual students' characteristics and academic history. Using a technique similar to regression analysis, he reduced the *Overall rating* by the amount estimated to be associated with the two general, non-school effects. The remainder was the portion of the *Overall rating* attributed to school effects. He then ranked the schools on this remainder, divided the ranked schools into quartiles, and assigned a letter-grade to the schools in each of the quartiles. Schools that had the greatest effect on their students—those in the first quartile of the ranking—received an A for value added. Schools ranked in the second quartile had an effect that was somewhat above average on their students and received a B. Schools ranked in the third quartile had an effect that was somewhat below average and received a C. Those schools that had the least effect on their students received a D.

For this *Report Card*, we have adopted a similar technique using regression analysis to determine the

effect of schools on student results as demonstrated by their relative success in the grade-6 language arts and mathematics provincial achievement tests. The procedure estimates the extent to which the grade-6 results are associated with *Parents' average education (yrs.)*—as the measure of student family characteristics—and the results achieved by the school's students on the corresponding grade-3 achievement test written three years earlier—as the measure of combined student characteristics like basic ability, motivation, and prior academic experience. The grade-6 results were then reduced by the amount estimated to be associated with these two non-school effects. Finally, the schools were ranked and assigned a letter grade for value added as described in the preceding paragraph.

Note that the value-added letter grade is only an estimate. First, we cannot be certain that every student at the school in grade 6 was also at the school in grade 3. Second, for schools whose grade-3 classes scored very well or very poorly, it is likely that any change in their level of achievement will be towards the average rather than away from it. For instance, at

a school where the average test mark for the grade-3 class was in the top 2% of all schools, it would be extremely unlikely that its grade-6 results three years later would be even better. Third, there may be factors unrelated to school performance that explain why grade-6 results at a school will differ markedly from grade-3 results. For instance, students at French immersion schools take the grade-3 Language Arts test in English even though they have not yet received instruction in English. Because they subsequently take instruction in English, it is likely that they will show considerable improvement in that language by the time they take the grade-6 Language Arts achievement test.

Nevertheless, the *Value-added* indicators can be useful in that they estimate change over time in the school achievement of a particular cohort of students. Thus, they take personal and family characteristics into account and provide a reasonable measure of the effect of the school on the students' level of achievement between grades 3 and 6. (See Appendix 2 for further details of the calculation of the *Value-added* indicators.)

Detailed school reports

How to read the tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their students should seek to confirm the *Report Card*'s findings by visiting the school and interviewing teachers, school administrators, and other parents. And, of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. More information regarding schools may be

found on the Alberta Education website at <http://ednet.edc.gov.ab.ca/k_12/> and on the websites of local school authorities.

IMPORTANT: In order to get the most from the Report Card, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

A – GEOGRAPHICAL AREA							
School name [Affiliation]				Gr 6 enrollment: 29			
C – ESL (%): 5.5 Special Needs (%): 32.5				Alt. French (%): 0.0			
D – Parents' average education (yrs): 13.5				Rank: 656 / 714			
E –				Last 5 Years: 393 / 592			
Academic Performance		2003	2004	2005	2006	2007	Trend
F – Gr 3 avg test mark	Lang. Arts	67.8	72.2	69.2	63.0	56.6	▼
G –	Math	71.4	71.2	75.1	73.3	44.9	—
H – Gr 6 avg test mark	Lang. Arts	71.5	77.6	67.5	67.1	71.7	—
I – 8888~8888Math	62.2	80.6	70.9	65.4	65.4	—	—
J – Gr 6 gender gap	Lang. Arts	n/a	M 1.4	n/a	n/a	F 8.8	n/a
K –	Math	n/a	M 4.3	n/a	n/a	F 9.4	n/a
L – Percentage of tests failed		11.4	11.7	4.1	10.7	23.8	—
M – Tests not written (%)		27.8	21.4	24.6	18.3	21.1	▲
N – 3-year value added	Lang. Arts	A	A	A	A	A	n/a
O –	Math	B	A	A	B	A	n/a
P – Overall rating out of 10		5.4	7.0	6.8	5.4	3.3	—

A Each of the schools in the *Report Card* has been assigned to a Geographic Area based on the city or town in which the school is located. Grouping schools in these Geographic Areas makes it easier to compare them. Within each Geographic Area, the schools are in order of their 2007 Overall rating out of 10.

B The number of students enrolled in grade 6 in the spring of 2007. Indicator results for small schools

tend to be more variable than those for larger schools and caution should be used in interpreting the results for smaller schools.

C (left)—ESL (%) The percentage of students at the school who are enrolled in English-as-a-Second-Language (ESL) programs. Use these statistics to identify schools that serve similar student populations.

- C (middle)—Special needs (%) The percentage of students at the school who have identified special needs. Gifted students are not included in this count.
- C (right)—Alt. French program (%) The percentage of students at the school who are enrolled in French immersion or other alternative programs in French. This percentage does not include those enrolled in Francophone programs or in regular French courses.
- D The average number of years of education of the most educated parent (or lone parent in a single parent family). Higher values of this statistic are commonly thought to be associated with better student performance. Use this statistic to identify schools at which the students share similar family backgrounds.
- E The school's overall academic rank in the province for 2006/2007 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the province. A high ranking over five years indicates consistently strong results at the school.
- F to I The average mark (%) achieved by the students on the grade-3 and grade-6 provincial achievement tests in language arts and mathematics. Note that all the academic performance indicators—except the 3-year value added indicators and the Overall rating out of 10—are expressed as percentage points.
- J & K The difference (in percentage points) between boys and girls in their average marks on the grade-6 language-arts and mathematics achievement tests. Where the difference favours the girls the value is preceded by an F. Where boys are favoured, the value is preceded by an M. An E means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students.
- L The percentage of all the grade-3 and grade-6 achievement tests in language arts and mathematics written by students at the school that were below the acceptable standard.
- M The percentage of the tests that could have been completed by the school's students but were not assigned a score. The Tests not written percentage takes into account tests not completed due to students' absence; because students were excused from writing the test by the superintendent; or where students' results were withheld because, for instance, they retired during the test sitting due to illness or they were found to have cheated. Note that schools that administer these tests are expected to ensure that all their students participate. For this reason, you should take note of the *Tests not written* percentage when you consider each school's results on the *Report Card*. The principal of a school with a high *Tests not written* percentage should be able to provide good reasons for the students' failure to complete the tests.
- N & O These are estimates of the school's contribution to its students' results on the grade-6 language-arts and mathematics achievement tests. Schools that have a strong positive impact on their students receive an A for this indicator. Those that receive a B or a C may have some positive impact on their students. Schools that have little impact receive a D.
- P The *Overall rating out of 10* takes into account the seven indicators described in rows F through L above to answer the question, "In general, how is the school doing academically compared to other schools in the province?"
- Q An upward pointing arrow (▲) at the end of an indicator row means that the school is probably improving on that indicator. A downward pointing arrow (▼) means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash indicates that

there is no significant change. Where insufficient data were available, “n/a” appears in the column. Note that for Percentage of tests failed, Tests not written, and the two Gender gap indicators, a downward trend in the data will lead to an upward pointing arrow (▲) in the trend column. For example, a decreasing Percentage of tests failed indicates improvement and so an upward pointing arrow (▲) is displayed.

Other notes

Note 1

Not all the province’s elementary schools are included in the tables or the ranking. Of all the schools in the province reporting results for the achievement tests, 714 are included in this *Report Card*. In some school districts and divisions that operate middle schools or junior high schools, the elementary schools may not enroll students in grade 6. Since the *Report Card* is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included.

In addition, schools at which fewer than 15 students were enrolled in either grade 3 or grade 6 are excluded, as are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10* for the school year 2006/2007.

Note 2

In accordance with its regulations regarding the privacy of personal information, where school results involved less than six students, Alberta Education provided no data. Alberta Education has also refused to provide data on test results from federally-funded, First-Nations, on-reserve schools.

Note 3

Due to continuing improvements in methodology, some historical values for indicators and overall ratings may differ from those previously reported.

Note 4

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, “n/a” appears in the tables.

Note 5

You can compare a school’s results with the all-schools average results below.

Note 6

If you have questions about the *Report Card on Alberta’s Elementary Schools*, contact Peter Cowley, Director of School Performance Studies at The Fraser Institute at 604.714.4556.

Average values for all schools 2006-2007							
Parents’ average education (yrs): 14.6				Gr 6 enrollment: 44			
Academic Performance		2003	2004	2005	2006	2007	Trend
Gr 3 avg test mark	Lang. Arts	69.7	69.9	71.4	69.5	68.4	—
	Math	75.4	76.1	76.9	77.6	72.4	—
Gr 6 avg test mark	Lang. Arts	68.8	68.5	66.1	65.8	67.6	—

Ranking the schools

Important notes to the rankings

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 710) according to their academic performance as measured by the *Overall rating out of 10* (shown on the right hand side of the table) for the school year 2006/2007. Each school's five-year average ranking and *Overall rating out of 10* are also listed. The higher the overall rating (out of 10), the higher the rank awarded to the school. Where schools tied in the overall rating, they were awarded the same rank. Where less than five years of data was available "n/a" appears in the table.

Not all the province's elementary schools are included in the tables or the ranking. Of all the schools in the province reporting achievement-test results, 714 are included in this *Report Card*. In some school districts and divisions that operate middle schools or junior high schools, the elementary

schools may not enroll students in grade 6. Since the *Report Card* is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included. In addition, schools at which fewer than 15 students were enrolled in either grade 3 or grade 6 are excluded, as are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10* for the school year 2006/2007.

The exclusion of a school from the *Report Card* should in no way be construed as a judgement of the school's effectiveness.

IMPORTANT: In order to get the most from the *Report Card*, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

Appendix 1: Calculating the Overall rating out of 10

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing, academically?” The following is a simplified description of the procedure used to convert the raw indicator data into the *Overall rating out of 10*.

- 1 Course by course, the average achievement test marks and failure rates for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 The course-by-course standardized failure-rate data were then aggregated to produce a weighted average standardized failure rate value. The weighting used was the number of student writers in each subject area at the school relative to the total number of student writers of the relevant tests.
- 3 This weighted average failure-rate result was then re-standardized.
- 4 The *Gender gap* indicators were calculated using the raw data and then standardized as described in step 1 above.
- 5 The seven standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weightings used in these calculations were *Average test mark* (for each of the four subject areas)—12.5%; *Percentage of tests failed*—30%; *Grade-6 gender gap: Language Arts*—10%; *Grade-6 gender gap: Mathematics*—10%. For schools for which there were no gender-gap results in either of the two courses, the *Percentage of tests failed* was weighted at 50%.
- 6 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 7 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 , respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 8 The resulting standardized scores were converted into *Overall ratings* according to the formula:

$$OR = \mu + (\sigma * \text{StanScore})$$

where *OR* is the resulting *Overall rating*, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and StanScore is the standardized score calculated in (6) above and adjusted as required for minimum and maximum values as noted in (7) above. As noted in (7) above, OR_{\min} equals zero, Z_{\min} equals -3.29; and Z_{\max} equals 2.2.

- 9 Finally, the derived *Overall rating* is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating*, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

Appendix 2: Calculating the *Value added* indicators

The *Value added* indicators were calculated as follows:

- 1 For each grade-6 test, for each of the school years from 2000/2001, the standardized results were regressed on the two independent variables, *Parents' average education* in years (based on 2001 Census data) and the standardized *Grade-3 average test mark* achieved at the school three years earlier. The regression coefficients were then determined (see table A2 below).
- 2 For each grade-6 test, for each of the three school years, the proportions of the standardized result associated with *Parents' average education (yrs)* and the standardized Grade-3 average test mark were deducted from the total, according to the formula:

$$G6_{\text{Seff}} = G6 - (b_{\text{Ed}} * \text{EdMEP}) - (b_{\text{g3}} * G3),$$

where $G6_{\text{Seff}}$ is the component of the grade-6 standardized results attributed to school effects; $G6$ is the actual, standardized grade-6 test result; b_{Ed} is the parents' average education (yrs) regression coefficient; EdMEP is the parents' average education (yrs) at the school; b_{g3} is the grade-3 standardized test mark regression coefficient; and, $G3$ is the average grade-3 standardized test mark achieved at the school three years earlier.

- 3 The proportion of the grade-6 standardized test result attributed to school effects ($G6_{\text{Seff}}$) was standardized.
- 4 The standardized values of $G6_{\text{Seff}}$ for all the schools were sorted from highest to lowest and divided into quartiles.
- 5 The results were converted into a letter grade determined by the quartile into which each result was placed. Schools whose result fell in the fourth (highest scoring) quartile, received a letter grade of A; those in the third quartile received a letter grade of B; those in the second quartile received a letter grade of C; and, those in the first quartile (lowest scoring) received a letter grade of D.

Table A2: The association of parents average education (yrs.) and grade-3 achievement test results with grade-6 achievement tests**Grade 6 Language arts - 2007**

Note: EdMEP is the average number of years of education of the most educated parent in student families. It is derived from 2001 Census data aggregated to the Dissemination Area (DA) level. Alberta Education provided the necessary enrollment data. For each of the two value-added indicators, the variable 2004_WeightedStdResultGr3 is the standardized average mark at the school on the indicated test sitting in the school year 2003/2004.

** = significant at 99% level.

About the authors

Peter Cowley

Peter Cowley is the Director of School Performance Studies at The Fraser Institute. He graduated from the University of British Columbia with a B.Comm. in 1974. Shortly thereafter, he began a long career in marketing and general management in several sectors. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. *The Parent's Guide* web site replaced the handbook in 1995.

In 1998, Mr Cowley was co-author of The Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed by *The 1999 Report Card on British Columbia's Secondary Schools*, *The 1999 Report Card on Alberta's High Schools*, and *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual report cards on Canadian schools. Annual editions now include report cards on secondary schools in British Columbia, Yukon, Alberta, Ontario, and Quebec and on elementary schools in British Columbia, Alberta, and Ontario as well as the annual *Report Card on Aboriginal Education in British Columbia*.

Stephen T. Easton

Stephen T. Easton, in addition to being a Senior Scholar at the Fraser Institute, is a professor of Economics, a member of the School for International Studies, and an Associate member of the School of Criminology at Simon Fraser University. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. Recent works published by The Fraser Institute include *Marijuana Growth in British Columbia* (2004), *Privatizing Prisons* (editor, 1998), *The Costs of Crime: Who Pays and How Much? 1998 Update* (with Paul Brantingham, 1998), and *Rating Global Economic Freedom* (editor, 1992). A co-author of *A Secondary Schools Report Card for British Columbia* (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* of British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (Toronto: C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Berlin: Springer-Verlag, 1997) and *Education in Canada: An Analysis of Elementary, Secondary, and Vocational Schooling* (Vancouver: The Fraser Institute, 1988). His editorials have been carried by the *Vancouver Sun*, the *Globe and Mail*, the *National Post*, the *Ottawa Citizen*, the *Stirling* chain and many other newspapers around the country.

Acknowledgments

The Fraser Institute wishes to thank the employees of Alberta Education for their help in the acquisition and verification of the data upon which this *Report Card* is based. We also wish to thank all of those who took the time to share with us their comments and criticisms. Without the contributions of these individuals, improvement would come much slower.
