A FRASER INSTITUTE OCCASIONAL PAPER

Studies in Education Policy are published periodically throughout the year by The Fraser Institute,
Vancouver, British Columbia, Canada.

The Fraser Institute

Our vision is a free and prosperous world where individuals benefit from greater choice, competitive markets, and personal responsibility. Our mission is to measure, study, and communicate the impact of competitive markets and government interventions on the welfare of individuals.

Founded in 1974, we are an independent research and educational organization with offices in Vancouver, Calgary, and Toronto, and international partners in over 70 countries. Our work is financed by tax-deductible contributions from thousands of individuals, organizations, and foundations. In order to protect its independence, the Institute does not accept grants from government or contracts for research.

To order additional copies of Studies in Education Policy, any of our other publications, or a catalogue of the Institute's publications, please contact the publications coordinator via our toll-free order line: 1.800.665.3558, ext. 580; via telephone: 604.688.0221, ext. 580; via fax: 604.688.8539; via e-mail: sales@fraserinstitute.ca.

For media enquiries, please contact Suzanne Walters, Director of Communications via telephone: 604.714.4582; via e-mail: suzanne@fraserinstitute.ca

To learn more about the Institute, please visit our website at www.fraserinstitute.ca.

Introduction

The *Report Card on British Columbia's Elementary Schools: 2006 Edition* (hereafter, *Report Card*) collects a variety of relevant, objective indicators of school performance into one, easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their schools.

The Report Card helps parents choose

Where parents can choose among several schools for their children, the *Report Card* provides a valuable tool for making a decision. Because it makes comparisons easy, it alerts parents to those nearby schools that appear to have more effective academic programs. Parents can also determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they visit schools under consideration and speak with the staff.

Of course, the choice of a school should not be made solely on the basis of any one source of information. Web sites maintained by the British Columbia Ministry of Education and local school boards can provide useful information.¹ Parents who already have a child enrolled at the school can provide another point of view. And, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. Nevertheless, the *Report Card* provides a detailed picture of each school that is not easily available elsewhere.

The Report Card encourages schools to improve

The act of publicly rating and ranking schools attracts attention, and this can provide motivation. Schools that perform well or show consistent improvement are applauded. Poorly performing schools generate concern, as do those whose performance is deteriorating. This inevitable attention provides an incentive for all those connected with a school to focus on student results.

However, the *Report Card* offers more than incentive: it includes a variety of indicators, each of which reports results for an aspect of school performance that might be improved. School administrators who are dedicated to improvement accept the *Report Card* as another source of opportunities for improvement.

Some schools do better than others

To improve a school, one must believe that improvement is achievable. This *Report Card*, like the Fraser Institute's report cards on secondary schools, provides evidence about what can be accomplished. It demonstrates clearly that, even when we take into account factors such as the students' family background, which some believe dictate the degree of academic success that students will have in school, some schools do better than others. This finding confirms the results of research carried out in other countries.² Indeed, it will come as no great surprise to experienced parents and educators that the data consistently suggest that what goes on in the schools makes a difference to academic results and that some schools make more of a difference than others.

Comparisons are the key to improvement

By comparing a school's latest results with those of earlier years, we can see if the school is improving. By comparing a school's results with those of neighbouring schools or of schools with similar school and student characteristics, we can identify more successful schools and learn from them. Reference to overall provincial results places an individual school's level of achievement in a broader context.

Comparisons are the key to improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card*'s indicators, ratings, and rankings.

What is new in this edition

New scale for Reading and Numeracy

This year, the Ministry of Education reported the

average scores for Reading and Numeracy for the school year 2004/2005 using a new scale. The scores range from approximately 2.5 to approximately -2.5. The average values for all schools on each of the affected indicators can be found in the table on page 13. The change in scale does not mean that the test content has changed; only that the method of reporting is different. The *Trends indicator* is unaffected by this change.

You can contribute to the development of the Report Card

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please contact us via e-mail to <reportcards@fraserinstitute.ca> or call Peter Cowley at 604.714.4556.

Elementary schools included in this report

This edition of the *Report Card* includes two types of elementary schools. The majority of the schools (743 out of 1,009) enroll both grade-4 and grade-7 students. An additional 266 elementary schools that do not enroll grade-7 students (hereafter referred to as “Type-2 schools”) are also included. The students who attend these elementary schools generally move to a middle school or junior high school after completing the highest grade (usually grade 5 or grade 6) that the school offers.

In several districts around the province, few, if any, of the elementary schools offer enrollment beyond grade 5 or grade 6. In Coquitlam school district, for example, all of the 53 standard, public elementary schools are Type-2 schools offering classes for Kindergarten to grade 5 only.

The procedure for determining the indicator values, ratings, and rankings for the two types of schools is the same with one important exception. Because Type-2 schools have no grade-7 enrollment, they do not generate the grade-7 level FSA results that are used in six of this *Report Card*’s nine academic indicators. However, students who were enrolled in Type-2 schools participate in the grade-7 test sittings—usually at a middle school—a year or two after they have left their elementary school. The Ministry of Education provides grade-7 level average test scores as well as data required for the calculation of the *Below expectations* indicator grouped by the school at which the students had enrolled in grade 4 rather than by the school at which the students had written the grade-7 tests. We are, therefore, able to attribute to each Type-2 school the grade-7 level test results of the students who attended grade 4 at the school.

We believe it is reasonable to make this attribution. In districts like Coquitlam, where Type-2

elementary schools predominate, parents are now able to compare academic performance at a combination of two schools—grades 1 through 5 at the elementary school and grades 6 and 7 at the middle school—with academic performance at Type-1 schools in the same and other districts.

Of course, the staff at Type-2 schools could argue that, since they cannot influence the effectiveness of learning outside their own school, they cannot be held responsible for the grade-7 results of their former students now attending a middle school. To some extent, this may be true. However, in many cases the Type-2 school has been responsible for the child’s academic development for five years and it is reasonable to assume that effective teaching during that period would benefit students as they move through their studies at middle school. Further, it is likely that the administrators in districts where middle schools are established have developed strong liaison programs to ensure that student progress continues uninterrupted by the transition from elementary to middle schools.

Further, we cannot be certain that all the grade-4 students at a Type-2 school moved to the same school for grade 7. In some cases, students will have two or more middle schools from which to choose. Some students may move to private schools offering a greater grade range. Still others may choose to attend a Type-1 school in a neighbouring district. However, there is no reason to believe that the ability to choose from a variety of grade-7 schools will effect a particular Type-2 school’s results systematically.

Readers reviewing the results for Type-2 schools should bear in mind that they reflect the combined effect of both the elementary school and the middle schools that its students subsequently attend.

Key academic indicators of school performance

The foundation of the *Report Card* is an overall rating of each school's academic performance. We base our *Overall rating* on nine indicators:

- (1) average, scaled³ Foundation Skills Assessments (FSA) score in grade-4 reading;
- (2) average, scaled FSA score in grade-4 writing;
- (3) average, scaled FSA score in grade-4 numeracy;
- (4) average, scaled FSA score in grade-7 reading;
- (5) average, scaled FSA score in grade-7 writing;
- (6) average, scaled FSA score in grade-7 numeracy;
- (7) the difference between male and female students in their average, scaled FSA scores in grade-7 reading;
- (8) the difference between male and female students in their average, scaled FSA scores in grade-7 numeracy;
- (9) the percentage of the above tests written by the school's students that were judged to reflect performance below expectations.

We have selected this set of indicators because they provide systematic insight into a school's performance. Because they are based on annually generated data, we can assess not only each school's performance in a year but also its improvement or deterioration over time.

Indicators of effective teaching

Average FSA scores

These indicators (in the tables, *Average scores*) show how well each school's students performed compared to students in all other schools on the uniform FSA tests in reading, writing, and numeracy at the grade-4 and grade-7 levels.

Fundamental to the mission of elementary schools is teaching its students the basic skills of reading, writing, and arithmetic. Basic literacy and numeracy are essential building blocks for life-long learning. The tests upon which the *Report Card* is based are designed to achieve a distribution of results reflecting the differences in students' mastery of this course work. Differences among students in abilities, motivation, and work-habits will inevitably have some impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on the FSA tests. There is also variation within schools in the results obtained in different subject areas and at different grade levels. Such differences in outcomes cannot be wholly explained by the individual and family characteristics of the school's students. It seems reasonable, therefore, to include the average test marks in these three critical subject areas as indicators of effective teaching.

Percentage of FSA tests below expectations

For each school, this indicator (in the tables, *Below expectations (%)*) measures the extent to which the school's students fail to meet the expected standard of performance on the FSA tests. It was derived by dividing the total number of all the tests in reading, writing and numeracy that were assigned the lowest achievement level—not yet meeting expectations—

by the total number of such tests that were assigned any of the three achievement levels: not yet meeting expectations, meeting expectations, and exceeding expectations.

Since reading, writing, and mathematics are critical to students' further intellectual and personal development, students should, at the minimum, be able to demonstrate that they meet the expected level of achievement for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take student differences into account? The *Gender gap* indicators

The Gender gap indicators (in the tables, *Gender gap*) use the grade-7 FSA results to determine how successful the school has been—compared to all the other schools—in narrowing the achievement gap between male and female students in reading and numeracy.⁴ They are calculated by determining the absolute value of the difference in the average scaled scores achieved by girls and boys on the grade-7 reading and numeracy tests. The differences in scaled score units are reported as well as the favoured sex.

There is much talk among education professionals about minimizing achievement gaps in our schools. Indeed, in the British Columbia Teachers' Federation's *Brief to the Ministry of Education's Student Achievement Task Force* (December 2002),⁵ more than half of the recommendations targeted the reduction of gaps in achievement between apparently disadvantaged groups of students and their classmates.

Undoubtedly, some personal and family characteristics, left unmitigated, can have a deleterious effect on a student's academic development. However, the *Report Card* provides evidence that successful teachers overcome any such impediments. By comparing

the results of male and female students in two subject areas—reading and numeracy—in which one group or the other has enjoyed a historical advantage, we are able to gauge the extent to which schools provide effective teaching to all of their students.

In general, how is the school doing, academically? *The Overall rating out of 10*

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance, we need an overall indicator of school performance (in the tables, *Overall rating out of 10*). Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall rating. This overall rating of school performance answers the question, "In general, how is the school doing, academically?"

To derive this rating, the results for each of the nine indicators, for each school year for which data were available, were first standardized. Standardization is a statistical procedure whereby sets of data with different characteristics are converted into sets of values sharing certain statistical properties. Standardized values can readily be combined and compared.

The standardized data were then weighted and combined to produce an overall standardized score. Finally, this score was converted into an overall rating out of 10. It is from this *Overall rating out of 10* that the school's provincial rank is determined.

For schools where only boys or girls were enrolled, there are, of course, no results for the Gender gap indicators. In these cases the *Overall rating out of 10* is derived using the remaining indicators. (See Appendix 1 for an explanation of the calculation of the *Overall rating*.)

Other indicators of school performance

The *Report Card* includes several other indicators that, while they are not used to derive the *Overall rating*, offer additional, useful information.

The *Tests not written* indicator

For Type-1 schools, the student participation indicator (in the tables, *Tests not written (%)*) was determined by first summing, for each of the six test sittings, the total number of students who were excused from the tests, were absent for some part of the tests, or did not complete the test to the extent necessary to score it. The six sums were then totaled. This result was then divided by the total number of tests that could have been completed if all students had fully participated in all of the tests that were administered at the school. For Type-2 schools, the student participation indicator was calculated using only data from the three grade-4 tests. We plan to include grade-7 data for these schools at such time as sufficient data are available.

Schools that administer the FSA assessments are expected to ensure that all their students write the tests. Higher participation rates provide the benefit of objective assessment of learning to more students and parents. They also provide a more accurate reflection of the level of achievement at the school. A reader can have more confidence that the test results are a true reflection of the school's average achievement level if all, or almost all, of its students write the tests. The principal of a school at which a relatively large percentage of students did not complete the tests should be able to provide good reasons for the students' failure to do so and a well-developed plan to increase participation in future test sittings.

Is the school improving academically? The *Trends* indicator

For all the indicators, the *Report Card* provides a number of years of data. Unlike a simple snapshot of one year's results, this historical record provides evidence of change (or lack of change) over time. However, it is often difficult to determine whether a school's performance is improving or deteriorating simply by scanning several years of data. To detect trends in the performance indicators more easily, we developed the *Trends* indicator. It uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. Since standardizing makes historical data more comparable, the standardized scores rather than raw data are used to determine the trends. Because calculation of trends is uncertain when only a small number of data points are available, a trend is indicated only in those circumstances where at least five years of data are available and where it is determined to be statistically significant. In this context, "statistically significant" means that, nine times out of 10, the trend that is noted is real; that is, it would not have happened just by chance.

The socio-economic indicator

Educators can and should take into account the abilities, interests, and backgrounds of their students when they design lesson plans and teach the curriculum. By doing so, they can overcome disadvantages that their students may have. The socio-economic indicator enables us to identify schools that are roughly similar

to each other with respect to the home background of their students so that their results can be compared. Effective schools produce good results regardless of the family background of their students.

For this edition of the *Report Card*, we use the parents' average education (in years) as the socio-economic indicator. This indicator uses data provided by the Ministry of Education to determine the number of students enrolled at the school who live in each of the province's census dissemination areas. It also uses data from the 2001 census, provided by Statistics Canada, to determine average values for a variety of family and parental characteristics for the families of elementary school-aged children in the same census dissemination areas.

Previous studies⁶ have shown that variations in student results from school to school cannot be accounted for solely by the personal and family characteristics of its students. Many other factors—including good teaching, counselling, and school administration—contribute to the effectiveness of schools. Indicators like *Parents' avg education (yrs)*

describe past relationships between a socio-economic characteristic and a measure of school effectiveness. It should not be inferred that these relationships will, or should, remain static. The more effectively schools enable all their students to succeed, the weaker will be the relationship between the home characteristics of students and their academic success. Thus, this socio-economic indicator should not be used as an excuse for poor school performance.

The student characteristics indicators

For each public school, the *Report Card* notes the percentage of its students who are enrolled in ESL programs and the percentage of its students who have certain identified special needs. As was noted in the Introduction, it is sometimes useful to compare a school's results to those of similar schools. These two indicators can be used to identify schools with similar student body characteristics.

Notes

- 1 See, for instance, the Ministry of Education at <<http://www.bced.gov.bc.ca/reporting/>> or the School District #36 (Surrey) at <<http://www.sd36.bc.ca/>>.
- 2 See, for instance, Michael Rutter et al., *Fifteen Thousand Hours: Secondary Schools and Their Effects on Children* (Cambridge, MA: Harvard University Press, 1979); Peter Mortimore et al., *School Matters: The Junior Years* (Wells, Somerset: Open Books, 1988).
- 3 The Ministry of Education provides the average score received by the students at each school on tests in each subject, at each grade level, for each year. The Writing average scores are proportional scale scores derived by the transformation of raw test scores. The range of these proportional scale scores varies across years, grade levels, and subject areas but is usually fall between about 250 and about 800. The Reading and Numeracy scores are derived using scoring techniques associated with “Item Response Theory.” In previous years, these scores ranged from zero to 1000. Beginning with the 2004/2005 school year, results are now reported by the ministry using a scale that ranges from about -2.5 to about +2.5.

The Ministry also assigns ranges of these scaled scores to three levels of achievement. The levels are described as: not yet meeting expecta-

tions, meeting expectations, and exceeding expectations. The expectations reflect the expected learning outcomes—the skills that each student is expected to acquire—in the subject area and grade level.

All of the *Report Card's* indicators except *Below expectations (%)* are calculated using average scaled scores. *Below expectations (%)* is calculated using the three levels of achievement.

- 4 For a discussion of gender-based differentials in academic achievement, see Peter Cowley and Stephen Easton, *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*, Public Policy Sources 22 (Vancouver, BC: The Fraser Institute, 1999).
- 5 British Columbia Teachers' Federation, *A Brief to the Ministry of Education Student Achievement Task Force* (BCTF, December 2002; <<http://www.bctf.ca/publications/briefs/StudentAchievement.html>>, as of April 10, 2005).
- 6 For a discussion of the relationship between parents' level of education and the *Overall rating out of 10* see, for instance, Peter Cowley with Shahrokh Shahabi-Azad, *Report Card on Alberta's High Schools: 2001 Edition*, Studies in Education Policy (Vancouver, BC: The Fraser Institute, 2001), page 14.

Detailed school reports

How to read the tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their students should seek to confirm the Report Card's findings by visiting the school and interviewing teachers, school administrators, and

other parents. More information regarding schools may be found on the British Columbia Ministry of Education web site at <<http://www.bced.gov.bc.ca/reporting/>> and on the web sites of local school districts.

Of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

DISTRICT NAME							
School name [Public or Independent]							Gr 4 enrollment: 28 - A
B - ESL (%): 37.0	Special needs (%): 5.7						
C - Parents' avg education (yrs): 15.9							
D - Tests not written (%): 11.5							
Academic Performance	2000	2001	2002	2003	2004	2005	Trends
E - Gr 4 avg score: Reading	528	519	526	491	516	0.16	—
F - Writing	n/a	519	521	510	578	627	▲
G - Numeracy	538	575	552	524	511	0.36	—
H - Gr 7 avg score: Reading	482	515	559	497	498	-0.09	—
I - Writing	n/a	535	537	515	591	510	—
J - Numeracy	539	546	570	526	510	0.10	▼
K - Gr 7 gender gap: Reading	M 4	M 29	M 20	F 89	M 16	F 0.43	—
L - Numeracy	M 35	M 60	M 24	F 31	M 32	M 0.31	—
M - Below expectations (%)	n/a	n/a	n/a	18.5	13.6	8.8	n/a
N - Overall rating out of 10	7.5	7.2	8.3	5.4	7.0	7.2	—

A —Grade-4 enrollment

The number of students enrolled in grade 4 as of September 30, 2004. Indicator results for small schools tend to be more variable than do those for larger schools and caution should be used in interpreting the results for smaller schools.

C —Parents' avg education (yrs)

The average number of years of education of the most educated parent (or lone parent in a single parent family). Higher values of this statistic are commonly thought to be associated with better student performance. Use this statistic to identify schools at which the students share similar family backgrounds.

B (left) —ESL (%)

The percentage of the students at the school who are enrolled in ESL programs.

D (left) —Tests not written (%)

The percentage of the tests that could have been completed by the school's students but that were not assigned a score. The *Tests not written* percentage takes into account students who were excused from the tests, were absent for some part of the tests, or did not complete the test to the extent necessary to score it.

B (right) —Special needs (%)

The percentage of the students at the school who have identified special needs.

Schools that administer these tests are expected to ensure that all their students participate. For this reason, you should take note of the *Tests not written* percentage when you consider each school's results on the *Report Card*. The principal of a school with a high percentage of tests not written should be able to provide good reasons for the students' failure to complete the tests. Note that the *Tests not written* percentage for Type-2 schools is based only on the grade-4 testing.

D (right)—Rank

The school's overall academic rank in the province for 2004/2005 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the province.

E through J —Gr 4 avg score and Gr 7 avg score

The Average score indicators show how well each school's students performed on the uniform FSA tests in reading, writing, and numeracy at the grade-4 and grade-7 levels. The value for each of these indicators is the average scaled score awarded to students from the school who wrote the test. Note that the scale used for the Average scores for Reading and Numeracy has changed this year. Scale values range from approximately -2.5 to +2.5. See the *All schools average* table below for the average values for schools in this *Report Card*.

K and L —Gr 7 gender gap

The gender gap scores report the difference (in the average scaled scores) between girls and boys on the grade-7 reading and numeracy tests. Where the difference favours the girls the value is preceded by an *F*. Where boys are favoured, the value is preceded by an *M*. An *E* means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students. **Note that because the scale used for the Reading and Numeracy average scores has changed this year, the Gender gap values are not directly comparable with those of previous years.**

M—Below expectations (%)

The percentage of all the completed tests written by the school's students that did not meet expectations. A low value for *Below expectations* indicates that the school ensures that most of its students are meeting or exceeding the expected level of performance for the grade.

N—Overall rating out of 10

The *Overall rating out of 10* takes into account the nine indicators described in rows E through M above to answer the question, "In general, how is the school doing academically?"

O—Trends

An upward pointing arrow at the end of an indicator row means that the school is probably improving on that indicator; a downward pointing arrow means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before rating an indicator as improving or getting worse. A dash (—) indicates that there is no significant change; "n/a" indicates that there was insufficient data available with which to calculate a trend. The measurement of trends is based on the most recent five years of data. Note that for *Below expectations* and the two gender-gap indicators a statistically significant downward trend in the data will lead to an upward pointing arrow in the Trends column. For example, a decreasing percentage of tests below expectations indicates improvement and so an upward pointing arrow is displayed.

Other notes

Note 1

Not all the province's elementary schools are included in the tables or the ranking. Of all the schools in the province reporting FSA results, 1,009 are included in this *Report Card*. Excluded are schools at which fewer than 15 students were enrolled in grade 4. Also excluded are Type-1 schools at which fewer than 15 students were enrolled in grade 7 and Type-2 schools

for which insufficient grade-7 data were available. (A description of Type-1 and Type-2 schools is provided in the section, “Elementary schools included in this report.”) Finally, schools of both types—including the province’s francophone schools—that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10* for the school year 2004/2005 were excluded.

The exclusion of a school from the *Report Card* should not be considered a judgment of the school’s effectiveness.

Note 2

In accordance with its regulations regarding the privacy of personal information, where school results involved less than five students, the ministry of education provided no data.

Note 3

Due to continuing improvements in methodology, some historical values for indicators and overall ratings may differ from those previously reported.

Note 4

The tables showing the detailed school results are grouped into four geographic regions of the province as follows: the Lower Mainland, Vancouver Island and

the Coast, the Fraser Valley and Southern BC, and the Interior and Northern BC. Within each geographic region, school districts are grouped alphabetically. To find a school’s results, find its city or town in the *List of cities and school districts* and note the school district in which the city is located. Find that page upon which each school district’s results begin by referring to the *Index of school districts*. Within each school district, both public and private schools are listed in order of their 2004/2005 provincial ranking. Where there are ties, the schools are listed in order of their provincial ranking for the most recent five years.

Note 5

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, “n/a” appears in the tables.

Note 6

You can compare a school’s results with these all-schools average results.

Note 7

If you have questions about the *Report Card*, contact Peter Cowley, Director of School Performance Studies at The Fraser Institute at 604.714.4556.

Average values for all schools 2004/2005							Gr 4 enrollment: 43

Ranking the schools

Important notes to the rankings

In this table, schools are ranked (on the left side of the page) in descending order (from 1 to 1,007) according to their academic performance as measured by the *Overall rating* (shown on the right side of the table) for the school year 2004/2005. Each school's five-year average ranking and *Overall rating* are also listed. The higher the overall school rating (out of 10), the higher the rank awarded to the school. Where schools tied in the *Overall rating*, they were awarded the same rank. Where fewer than five years of data were available, "n/a" appears in the table.

Not all the province's elementary schools are included in the tables or the ranking. Of all the

schools in the province reporting FSA results, 1,009 are included in this *Report Card*. Included are schools that enrolled at least 15 students in both grade 4 and grade 7. Also included are eligible schools (noted in this table with a double asterisk) whose students advanced to a middle school after grade 5 or grade 6 (see "Elementary schools included in this report" on page 5). Excluded are those schools—including the province's francophone schools—that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating* for the school year 2004/2005.

The exclusion of a school from the *Report Card* should not be considered a judgment of the school's effectiveness.

Appendix: Calculating the *Overall rating out of 10*

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing, academically?” The following is a simplified description of the procedure used to convert the data received from the ministry of education into the *Overall rating*.

- 1 Subject by subject, the average scaled Foundation Skills Assessments (FSA) test scores for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 The gender gap scores in grade-7 reading and grade-7 numeracy were each determined by calculating the absolute value of the difference between the average scaled score for girls and the average scaled score for boys. The results for each subject were then standardized.
- 3 The nine standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weights used in making this calculation for the FSA test scores from 2003 were: average scores for each of the six tests—8.3%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests—10%; and, percentage of tests below expectations—30%. For schools for which there were no gender-gap results, the average scores for each of the six tests were given a weight of 10.4% and the percentage of tests below expectations was weighted at 37.5%.

In making this calculation for the FSA test scores from 2001 and 2002, the weights used were: average scores for each of the six tests—13.3%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests: 10%. For schools for which there were no gender-gap results, the average scores for each of the six tests were each given weights of 16.7%.

In making this calculation for the FSA test scores from 2000, the weights used were: average scores for each of the four tests—20%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests: 10%. For schools for which there were no gender-gap results, the average scores for each of the four tests were given weights of 25%.

- 4 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 5 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.
- 6 The resulting standardized scores were converted into overall ratings according to the formula:

$$OR = \mu + (\sigma * StanScore)$$

where OR is the resulting Overall rating, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and $StanScore$ is the standardized score calculated in (4) above and adjusted as required for minimum and maximum values as noted in (5) above. As noted in (5) above, OR_{\min} equals zero, Z_{\min} equals -3.29; and Z_{\max} equals 2.2.

- 7 Finally, the derived overall rating is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its overall rating, it must improve more than the average. If it improves, but to an extent less than the average, it will show a decline in its rating.

About the authors

Peter Cowley

Peter Cowley is the Director of School Performance Studies at The Fraser Institute. He graduated from the University of British Columbia with a B.Comm. in 1974. Shortly thereafter, he began a long career in marketing and general management in several sectors. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. *The Parent's Guide* web site replaced the handbook in 1995. In 1998, Mr Cowley was co-author of The Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed by *The 1999 Report Card on British Columbia's Secondary Schools, Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*, and *The 1999 Report Card on Alberta's High Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual *Report Cards*. Annual editions now include *Report Cards* on secondary schools in British Columbia, Alberta, and Quebec; *Report Cards* on elementary schools in British Columbia, Yukon, Alberta, and Ontario; and *The Report Card on Aboriginal Education in British Columbia*. He continues his research on education and related issues for The Fraser Institute.

Stephen T. Easton

Stephen T. Easton is a professor of Economics at Simon Fraser University and a Senior Scholar at The Fraser Institute. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. Recent works published by The Fraser Institute include *Privatizing Prisons* (editor, 1998), *The Costs of Crime: Who Pays and How Much? 1998 Update* (with Paul Brantingham, 1998), and *Rating Global Economic Freedom* (editor, 1992). A co-author of *A Secondary Schools Report Card for British Columbia* (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* of British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (Toronto: C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Berlin: Springer-Verlag, 1997) and *Education in Canada: An Analysis of Elementary, Secondary and Vocational Schooling* (Vancouver: The Fraser Institute, 1988). His editorials have been carried by the *Vancouver Sun*, the *Globe and Mail*, the *National Post*, the *Ottawa Citizen*, the Stirling chain and many other newspapers around the country.

Acknowledgments

The Fraser Institute wishes to acknowledge the generous support for this project from the Lotte and John Hecht Memorial Foundation.
