Studies in Education Policy are published periodically throughout the year by The Fraser Institute.

Our vision is a free and prosperous world where individuals benefit from greater choice, competitive markets, and personal responsibility. Our mission is to measure, study, and communicate the impact of competitive markets and government interventions on the welfare of individuals.

Founded in 1974, we are an independent research and educational organization with offices in Calgary, Montréal, Tampa, Toronto, and Vancouver, and international partners in over 70 countries. Our work is financed by tax-deductible contributions from thousands of individuals, organizations, and foundations. In order to protect its independence, the Institute does not accept grants from government or contracts for research.

To order additional copies of Studies in Education Policy, any of our other publications, or a catalogue of the Institute's publications, please contact the publications coordinator via our toll-free order line: 1.800.665.3558, ext. 580; via telephone: 604.688.0221, ext. 580; via fax: 604.688.8539; via e-mail: sales@fraserinstitute.ca.

For media enquiries, please contact our Communications department via telephone: 604.714.4582; via e-mail: communications@fraserinstitute.ca. To learn more about the Institute, please visit our web site at <http://www.fraserinstitute.org>.

Introduction

The *Report Card on Ontario's Elementary Schools: 2008 Edition* (hereafter, *Report Card*) collects a variety of relevant, objective indicators of school performance into one, easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their schools.

The Report Card helps parents choose

Where parents can choose among several schools for their children, the *Report Card* provides a valuable tool for making a decision. Because it makes comparisons easy, it alerts parents to those nearby schools that appear to have more effective academic programs. Parents can also determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they visit schools under consideration and speak with the staff.

Of course, the choice of a school should not be made solely on the basis of a single source of information. Web sites maintained by Ontario's Education Quality and Accountability Office (EQAO),¹ the provincial ministry of education, and local school boards may also provide useful information.² Parents who already have a child enrolled at the school provide another point of view.

Naturally, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. Nevertheless, the *Report Card* provides a detailed

picture of each school that is not easily available elsewhere.

The Report Card facilitates school improvement

The act of publicly rating and ranking schools attracts attention, and this can provide motivation. Schools that perform well or show consistent improvement are applauded. Poorly performing schools generate concern, as do those whose performance is deteriorating. This inevitable attention provides an incentive for all those connected with a school to focus on student results.

However, the *Report Card* offers more than just incentive. It includes a variety of indicators, each of which reports results for an aspect of school performance that may be improved. School administrators who are dedicated to their students' academic success accept the *Report Card* as another source of opportunities for improvement.

Some schools do better than others

To improve a school, one must believe that improvement is achievable. This *Report Card*, like other report cards from The Fraser Institute, provides evidence about what can be accomplished. It demonstrates clearly that, even when we take into account factors such as the students' family background—which some believe dictate the degree of academic success that students can enjoy in school—some schools do better than others. This finding confirms the results of research carried out in other countries.³ Indeed, it will come as no great surprise to experienced parents and educators that the data consistently suggest that

what goes on in the schools makes a difference to academic results and that some schools make a greater difference than others.

Comparisons are at the heart of the improvement process

By comparing a school's latest results with those of earlier years, we can see if the school is improving. By comparing a school's results with those of neighbouring schools or schools having similar school and student characteristics, we can identify more successful schools and learn from them. Reference to overall provincial results places an individual school's level of achievement in a broader context.

There is great benefit in identifying schools that are particularly effective. By studying the techniques used in schools where students are successful, less effective schools may find ways to improve. This

advantage is not lost on the United Kingdom's Department of Education and Skills. Its "Leading Edge" program⁴ helps educators connect with others who have expertise in particular areas of instruction and school administration.

Comparisons are at the heart of improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card's* indicators, ratings, and rankings.

You can contribute to the development of the *Report Card*

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please contact Peter Cowley at 604.714.4556.

Key academic indicators of school performance

The foundation of the *Report Card* is an overall rating of each school's academic performance. We base our *Overall rating out of 10* on the school's performance on nine indicators, all of which are derived from province-wide tests of reading, writing, and mathematics skills that are administered by the province's Education Quality and Accountability Office (EQAO).⁵

- (1) average level of achievement on the grade-3 EQAO assessment in reading;
- (2) average level of achievement on the grade-3 EQAO assessment in writing;
- (3) average level of achievement on the grade-3 EQAO assessment in mathematics;
- (4) average level of achievement on the grade-6 EQAO assessment in reading;
- (5) average level of achievement on the grade-6 EQAO assessment in writing;
- (6) average level of achievement on the grade-6 EQAO assessment in mathematics;
- (7) the difference between male and female students in their average levels of achievement on the EQAO assessment in grade-6 reading;
- (8) the difference between male and female students in their average levels of achievement on the EQAO assessment in grade-6 mathematics;
- (9) the percentage of EQAO assessments that did not meet the provincial standard.

We have selected this set of indicators because they provide systematic insight into a school's performance. Because they are based on annually generated data, we can assess not only each school's performance in a year but also its improvement or deterioration over time.

Indicators of effective teaching

Average levels of achievement on EQAO's assessments

These indicators—in the tables, *Grade 3 avg. level* and *Grade 6 avg. level*—show the average level of proficiency achieved by the school's students on the uniform EQAO assessments in reading, writing, and mathematics at the grade-3 and grade-6 levels. The EQAO converts the raw score on each test into a level of achievement from 1 to 4. Achievement at Levels 1 and 2 suggest that the student has not yet met the provincial standard. Level 3 is considered the provincial standard and Level 4 represents achievement well above the expected level. Achievement at Level 3 or 4 suggests that students are well prepared for work at the next grade.

In order to calculate the average level achieved by the students at a school on any given test, a numerical value was given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level 3, a value of 3; and Level 4, a value of 4. A value of 0 was given in those cases where a student completed the test but did not demonstrate sufficient understanding to be assigned achievement Level 1.

Fundamental to the mission of elementary schools is teaching students sound basic skills in reading, writing, and mathematics. Basic literacy and numeracy

are essential building blocks for life-long learning. The tests upon which the *Report Card* is based assess students on these dimensions. Differences among students in abilities, motivation, and work habits will inevitably have some impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on the EQAO's tests. There is also variation within schools in the results obtained in different subject areas and at different grades. Such differences in outcomes cannot be wholly explained by the individual and family characteristics of the school's students. It seems reasonable, therefore, to include the average test marks in these three critical subject areas as indicators of effective teaching.

Percentage of EQAO tests below standard

For each school, this indicator—in the tables *Tests below standard (%)*—provides the rate of failure on the EQAO's tests. It was derived by dividing the total number of all the above tests that provided enough information to enable the calculation of a score but that did not meet the provincial standard, by the total number of such tests written by the students at the school.

Since reading, writing, and mathematics are critical to students' further intellectual and personal development, students should, at the minimum, demonstrate that they meet the accepted standard of performance for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take student differences into account?

The Gender gap indicators

The Gender gap indicators—in the tables *Gender gap (level)*—use the grade-6 results of the EQAO's assessments to determine how successful the school has been in narrowing the achievement gap between male and female students in reading and mathematics.⁶ These indicators are determined, for each subject

area, by calculating the absolute value of the difference between male and female students in their average level of achievement. The more successful sex is reported along with the difference in the detailed tables.

Undoubtedly, some personal and family characteristics, left unmitigated, can have a deleterious effect on a student's academic development. The *Report Cards* provide evidence that successful teachers overcome such impediments. By comparing the results of male and female students in two subject areas—reading and mathematics—in which one group or the other has enjoyed a historical advantage, we are able to gauge the extent to which schools provide effective teaching to all of their students.

In general, how is the school doing, academically?

The Overall rating out of 10

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance, we need an overall indicator of school performance—in the tables *Overall rating out of 10*. Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall rating. The overall rating of school performance answers the question, "In general, compared with other schools in the province, how is the school doing, academically?"

To derive this rating, the results for each of the nine indicators, for each school year, were first standardized. Standardization is a statistical procedure whereby sets of raw data with different characteristics are converted into sets of values sharing certain statistical properties. Standardized values can readily be combined and compared. The standardized data were then weighted and combined to produce an overall standardized score. Finally, this score was converted into an overall rating out of 10. It is from this *Overall rating out of 10* that the school's provincial rank is determined.

Note that the Overall rating out of 10, based as it is on standardized scores, is a relative rating. That is, it measures each school's performance compared to all the other schools in the province. Thus, even though a school receives an overall rating of 10, it is very likely that it can still improve. An overall rating of zero means that on average, on the report card's indicators, no school in the province performed more poorly. However, it does not mean that the lowest performing school has accomplished nothing for its students.

Further, because it is a relative measure, in order for a school to show improvement in its Overall rating out of 10, it must improve faster than the average. If it improves, but at a rate lower than the average, it will show a decline in its rating.

For schools where there were fewer than 15 test results for boys or for girls, no values for the *Gender gap* indicators can be provided. In these cases the *Overall rating out of 10* is derived using the remaining indicators. (See Appendix 1 for an explanation of the calculation of the *Overall rating out of 10*.)

Other indicators of school performance

The *Report Card* includes other indicators that, while they are not used to derive the *Overall rating out of 10*, add more information on the school's effectiveness.

The *Tests not written* indicator

Schools that administer the EQAO's assessments are expected to ensure that all their students write the tests. Higher participation rates provide the benefit of objective assessment of learning to more students and parents. They also provide a more accurate reflection of the level of achievement at the school. A reader can have more confidence that the test results are a true reflection of the school's average achievement level if all, or almost all, of its students write the tests.

The indicator of tests not written—in the tables *Tests not written (%)*—was determined by first summing, for each of the six test sittings, the total number of students for whom no test data was submitted or who were exempt from testing. The six sums were then totaled. This result was then divided by the total number of tests that could have been completed if all students had fully participated in all of the tests that were administered at the school.

The principal of a school at which a relatively large percentage of students did not complete the tests should be able to provide good reasons for the students' failure to do so and a well-developed plan to increase participation in future test sittings.

The *Trend* indicator

Is the school improving academically? The *Report Card* provides five years of data for most schools.

Unlike a snapshot of one year's results, this historical record provides evidence of change (or lack thereof) over time.

To detect trends in the performance indicators, we developed the Trend indicator. This indicator uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. To calculate the trends, the standardized scores rather than raw data are used. Standardizing makes historical data more comparable and the trend measurement more reliable. Because calculation of trends is uncertain when only a small number of data points is available, a trend is indicated only in those circumstances where five years of data are available and where the trend is statistically significant. For this indicator, we have defined the term "statistically significant" to mean that, nine times out of 10, the trend that is noted is real; that is, it did not happen just by chance.

The socioeconomic indicator

Educators can and should take into account the abilities, interests, and backgrounds of their students when they design lesson plans and teach the curriculum. By doing so, they can overcome disadvantages that their students may have. The socio-economic indicator enables us to identify schools that are roughly similar to each other with respect to the home background of their students so that their results can be compared. Effective schools produce good results regardless of the family background of their students.

For this edition of the Report Card, we use the parents' average education as the socio-economic

indicator. This indicator uses enrollment data provided by the Ministry of Education sorted by Statistics Canada's census Dissemination Areas.⁷ It also uses data from the 2001 census, provided by Statistics Canada, to determine average values for a variety of family and parental characteristics for the families of elementary school-aged children in the same census dissemination areas.

Previous studies⁸ have shown that variations in student results from school to school cannot be accounted for solely by the personal and family characteristics of its students. Many other factors—including good teaching, counselling, and school administration—contribute to the effectiveness of schools. Indicators like Parents' avg education (yrs) describe past relationships between a socioeconomic characteristic and a measure of school effectiveness. It should not be inferred that these relationships will, or should, remain static. The more effectively schools enable all their students to succeed, the weaker will be the relationship between the home characteristics of students and their academic success. Thus, this socioeconomic indicator should not be used as an excuse for poor school performance.

Indicators of value added

Measures of value added are designed to show whether a school is having a positive effect on its students over a period of time. That is, does what happens in school—teaching, counseling, encouragement, and the like—really matter? Do students succeed, at least partly, because of the quality of the school or is it simply that the children of well-educated, highly motivated parents do relatively better than all the rest. One method used to isolate the effect of the school is to reduce a given school result by the amount estimated to be due to such non-school effects as the students' personal and family characteristics.

For the Report Card on Quebec's Secondary Schools—2002 Edition,⁹ Professor Richard Marceau, co-author of the Report Card, developed a technique to isolate the schools' effect on

the Report Card's Overall rating indicator. Using a technique¹⁰ similar to regression analysis, he reduced the overall rating by the amount estimated to be associated with the two general non-school effects. The remainder was the portion of the overall rating attributed to school effects. He then ranked the schools on this remainder, divided the ranked schools into quartiles, and assigned a letter grade to the schools in each of the quartiles. Schools that accounted for the greatest proportion of their overall rating—those who were in the first quartile of the ranking—received an "A" for value added. Schools that accounted for a lesser proportion of their overall rating—those in lower quartiles—received progressively lower letter grades.

For this Report Card, we have adopted a similar technique to determine the effect of the activities of the school on student learning during grades 4, 5, and 6. As a benchmark of student ability and achievement, we determined the average level of achievement at the school on the EQAO's grade-3 level assessments in reading and mathematics three years prior to the most recent school year for which we have published data. As a measure of general social and economic characteristics of the students' families, we determined the average level of education of each school's parents. Finally, we determined the average level of achievement of the school's students in the most recent school year for which we have data on the grade-6 level assessments in reading and math. Using regression analysis—a commonly used statistical tool—we calculated the extent to which the grade-6 assessments were associated with the two benchmark values and the grade-6 results were then reduced by the amount estimated to be associated with these two effects. The remainder we judged to be a measure of the effect of the school on student learning over the three-year period. Finally, the schools were ranked and assigned a letter grade for value added as described in the preceding paragraph.

Note that the letter grade for value added is only an estimate. First, we cannot be certain that every student at the school in grade 6 was also at the school in grade 3. Second, for schools whose grade-3 classes

scored very well or very poorly, it is likely that any change in their level of achievement will be toward the average rather than away from it. For instance, at a school where the average level of achievement for the grade-3 class was in the top 2% of all schools, it would be extremely unlikely that its grade-6 results three years later would be even better. Third, there may be reasons unrelated to school performance that explain why grade-6 results at a school will differ markedly from grade-3 results. For instance, students at French

immersion schools may be better prepared for the grade-6 English language reading test than they were for the grade-3 assessment three years earlier.

Nevertheless, the indicators of value added—in the tables *3-year value added*—takes personal and family characteristics into account to provide a reasonable estimate of the effect of the school on the students' level of achievement between grades 3 and 6. (See Appendix 2 for further details of the calculation of the indicators of value added.)

Notes

- 1 The Education Quality and Accountability Office (EQAO) is an arm's-length agency of the provincial government. It provides parents, teachers, and the public with information about student achievement. For more information, see the EQAO's web site at <<http://www.eqao.com/>>.
- 2 See, for instance, the EQAO's web site at <<http://www.eqao.com/>>, the Ministry of Education's web site at <<http://www.edu.gov.on.ca/>>, or the web site of the Toronto Catholic District School Board at <<http://www.tcdsb.org/>>.
- 3 See, for instance, Michael Rutter et al., *Fifteen Thousand Hours: Secondary Schools and Their Effects on Children* (Cambridge, MA: Harvard University Press, 1979) and Peter Mortimore et al., *School Matters: The Junior Years* (Wells, Somerset: Open Books, 1988).
- 4 See the website of *Leading Edge* at <<http://www.standards.dfes.gov.uk/leadingedge/>> (as of May 24, 2006).
- 5 The EQAO's test results, student enrollment data, and school information used or reported in this publication were provided by the Ontario Ministry of Education. The results or views expressed in this publication are those of the authors and are not those of the Ontario Ministry of Education.
- 6 For a discussion of gender-based differentials in academic achievement, see Peter Cowley and Stephen Easton, *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*. Public Policy Sources 22 (Vancouver, BC: The Fraser Institute, 1999).
- 7 A Dissemination Area (DA) is a small geographic area comprising one or more neighbouring blocks, with a population of 400 to 700 persons. The DA is the smallest standard geographic area for which all census data are disseminated. All of Canada is divided into dissemination areas.

Detailed school reports

How to read these tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their children should seek to confirm the *Report Card*'s findings by visiting the school and interviewing teachers, school administrators, and other parents. The complete *Report Card* can be downloaded free of charge from The Fraser Institute's web site at <<http://www.fraserinstitute.org>>. More information regarding test results at individual schools can be found on the Education Quality and Accountability Office (EQAO) web site at <<http://www.eqao.com>> and on the web sites of local school districts and schools. Of course, a sound academic program should be complemented by effective pro-

grams in areas of school activity not measured by the *Report Card*.

Note

Private schools are not required to administer the EQAO tests. Since the *Report Card* is based on results achieved on these tests, only a few private schools that chose to administer the EQAO tests could be included.

IMPORTANT: In order to get the most from the Report Card, readers should consult the complete table of results for each school of interest. By considering several years of results— rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

A – GEOGRAPHICAL AREA NAME							
B – School name [Affiliation] City							
C – Parents' avg education (yrs): 14.7		2006-07		Last 5 yrs			
D – Gr 6 enrollment: 58		Rank: 1120/2786		505/2374			
Academic Performance		2003	2004	2005	2006	2007	Trends
E – Gr 3 avg. level:	Reading	2.8	3.0	2.8	3.0	2.5	—
F –	Writing	3.0	3.2	2.9	2.9	2.7	▼
G –	Math	2.9	3.3	3.0	3.0	2.6	—
H – Gr 6 avg. level:	Reading	2.5	2.7	2.9	2.9	2.9	▲
I –	Writing	2.6	2.6	2.8	2.8	2.9	▲
J –	Math	2.5	2.9	2.8	3.0	2.8	—
K – Gender gap (level):	Reading	E	F 0.3	F 0.5	F 0.1	F 0.3	—
L –	Math	M 0.1	F 0.2	F 0.4	M 0.1	F 0.1	—
M – Tests below standard (%)		31.3	22.7	22.7	20.1	29.6	—
N – Tests not written (%)		5.3	9.0	6.2	10.5	0.0	—
O – 3-year value added:	Reading	D	C	A	B	A	n/a
P –	Math	C	B	B	A	B	n/a
Q – Overall rating out of 10		7.4	7.7	6.8	7.7	6.5	—

A — The schools are grouped into geographical areas. To find a school's results, find its location in the "List of cities and geographical areas" and note its geographical area. Find the geographical

area in the "Index of geographical areas" and note the page on which its results begin. Within each geographical region, the schools are listed in alphabetical order.

B — The school name, its affiliation—public, separate, or private—and the city in which the school is located.

C — The average number of years of education of the most educated parent (or lone parent in a single parent family). Higher values of this statistic are commonly thought to be associated with better student performance. Use this statistic to identify schools at which the students share roughly similar family backgrounds.

D (left) — The number of students eligible to participate in the grade-6 tests. Indicator results for schools with small enrollments tend to be more variable than do those for larger schools. For this reason it is particularly important to consider previous results as well as those for the most recent year.

D (right) — The school's overall academic rank in the province for 2006/2007 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the province. A high ranking over five years indicates consistently strong results at the school.

E to J — The average level achieved by the students on the grade-3 and grade-6 EQAO tests. The EQAO assigns a level of achievement to each completed test. Achievement at Levels 1 and 2 suggest that the student has not yet met the provincial standard. Level 3 is considered the provincial standard and Level 4 represents achievement well above the expected level. Thus, achievement at Level 3 or 4 suggests that students are well prepared for work at the next grade. In order to calculate the average level, a numerical value was given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level 3, a value of 3; and Level 4, a value of 4. In those cases where a student completed the test but did not demonstrate sufficient understanding to be assigned achievement Level 1, the test was given a value of 0.

K & L — The difference (in average level of achievement) between girls and boys in the grade-6 reading and mathematics tests. Where the difference favours the girls, the value is preceded by an F. Where boys are favoured, the value is preceded by an M. An E means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students.

M — The percentage of all the completed tests written by students at the school that were judged to be below Level 3. A low percentage of *Tests below standard* (%) indicates that the school is successful in ensuring that most of its students are meeting or exceeding the provincial standard of performance for the grade.

N — The percentage of the tests that could have been completed by the school's students but which were not assigned an overall score. The percentage, *Tests not written*, takes into account tests not written by students for whom no results were received by the EQAO or who were exempt from writing the tests.

Important note

Schools that administer these tests are expected to ensure that all their students participate. For this reason, you should take note of the *Tests not written* percentage when you consider each school's results in the *Report Card*. The principal of a school with a high *Tests not written* percentage should be able to provide good reasons for the students' failure to complete the tests.

O & P — These are estimates of the school's contribution to its students' results on the grade-6 reading and mathematics tests. Schools that have a strong positive impact on their students receive an A for this indicator. Those that receive a B or a C may have some positive impact on their students. Schools that have little positive impact receive a D.

Q — The *Overall rating out of 10* takes into account the nine indicators described in E through M above to answer the question, "In general, compared to other schools in the province, how is the school doing academically?"

R — An upward-pointing arrow at the end of an indicator row means that the school is probably improving on that indicator. A downward-pointing arrow means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash indicates that there is no significant change. Where insufficient data were available, “n/a” appears in the column. Note that for the two *Gender gap* indicators, *Tests not written*, and *Tests below standard* a downward trend in the data will lead to an upward-pointing arrow in the trend column. For example, a decreasing *Tests below standard (%)* indicates improvement and so an upward-pointing arrow is displayed.

Other notes

Note 1

Not all the province's elementary schools are included in the tables or the ranking. In some school districts that operate middle schools or junior high schools, the elementary schools may not enroll students in grade 6. Since the *Report Card* is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included. In addition, schools at which fewer than 15 students were enrolled in each of these grades are excluded. Private schools and federally funded schools operated by First Nations are not required to administer the EQAO tests. Since the results of these tests form the basis for this *Report Card*, only those schools that administer the EQAO tests could be included. Finally, also excluded are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10*.

The exclusion of a school from the *Report Card* should not be considered a judgement of the school's effectiveness.

Note 2

The EQAO's test results, student enrollment data, and school information used or reported in this publication were provided by the Ontario Ministry of Education. The results or views expressed in this publication are those of the authors and are not those of the Ontario Ministry of Education.

Note 3

Due to continuing improvements in methodology, some historical values for indicators and overall ratings may differ from those previously reported.

Note 4

In accordance with its regulations regarding the privacy of personal information, where the results in a test involved fewer than 15 students, the EQAO provided no data.

Note 5

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, “n/a” appears in the tables.

Note 6

You can compare a school's results with these all-schools average results in the table below.

Note 7

If you have questions about the Report Card, contact Peter Cowley, Director of School Performance Studies at The Fraser Institute at 604-714-4556.

Average values for all schools 2006/2007						
Parents' avg education (yrs): 14.8			Gr 6 exam writers: 45			
Academic Performance	2003	2004	2005	2006	2007	Trend
Gr 3 avg. level:						
Reading	2.5	2.6	2.6	2.6	2.6	▲
Writing	2.7	2.7	2.7	2.7	2.7	▲
Math	2.7	2.8	2.7	2.8	2.8	—
Gr 6 avg. level:						
Reading	2.6	2.7	2.7	2.7	2.7	—
Writing	2.6	2.6	2.6	2.7	2.7	▲
Math	2.7	2.7	2.7	2.7	2.7	—
Gender gap (level):						
Reading*	0.3	0.3	0.2	0.3	0.2	—
Math*	0.2	0.2	0.2	0.2	0.2	—
Exams below standard (%)	40.1	37.1	35.8	33.0	34.0	▲
Tests not written (%)	11.1	9.6	5.1	5.6	4.6	▲
Overall rating out of 10	6.0	6.0	6.0	6.0	6.0	—

* These results reflect the average size of the grade 6 gender gaps in 2006-2007. The Reading gender gap favoured females at 74.7% of schools, males at 12.4% of schools, and was even at 12.9% of schools. The Math gender gap favoured males at 41.6% of schools, females at 38.5% of schools, and was even at 19.9% schools.

Ranking the schools

Important Notes to the Rankings

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 2775) according to their academic performance as measured by the Overall rating out of ten (shown on the right hand side of the table) for the school year 2006/2007. Each school's five-year average ranking and Overall rating out of ten are also listed. The higher the overall rating (out of 10), the higher the rank awarded to the school. Where schools tied in the overall rating, they were awarded the same rank. Where less than five years of data was available "n/a" appears in the table.

Not all the region's elementary schools are included in the tables or the ranking. In some school districts that operate middle schools or junior high schools, the

elementary schools may not enroll students in grade 6. Since the Report Card is based on the results of tests given in grades 3 and 6, these elementary schools cannot be included. In addition, schools at which fewer than 15 students were enrolled in each of these grades are excluded. Private schools and First Nations operated, federally funded schools are not required to administer the EQAO tests. Since the results of these tests form the basis for this Report Card, only those schools that administer the EQAO tests could be included. Finally, also excluded are schools that did not generate a sufficiently large set of student data to enable the calculation of an Overall rating out of 10

The exclusion of a school from the Report Card should in no way be construed as a judgement of the school's effectiveness.

Appendix 1: Calculating the Overall rating out of 10

The *Overall rating out of 10* is intended to answer the question, “In general, compared to other schools in the province, how is the school doing, academically?” The following is a simplified description of the procedure used to convert the data received from the Ministry of Education into the *Overall rating out of 10*.

- 1 Subject by subject, the *Average levels* and *Tests below standard* values for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 The subject-by-subject standardized data for *Tests below standard* were then aggregated to produce a weighted average standardized value. The weighting used was the number of student writers in each subject relative to the total number of student writers of the relevant tests.
- 3 This weighted average result for *Tests below standard* was then re-standardized.
- 4 The *Gender gap* values in grade-6 reading and mathematics were each calculated by determining the absolute value of the difference in the level of achievement of male students and female students at the school. The results for each subject were then standardized.
- 5 The nine standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weightings used in these calculations were: *Average level* for each of the six tests—8.3%; *Gender gap* for each of the grade-6 reading and grade-6 mathematics tests: 10%; *Tests below standard*—30%. For schools for which there were no gender gap results, the weightings used were: *Average level* for each of the six tests—10.4%; *Tests below standard*—37.5%.
- 6 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 7 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the

population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 8 The resulting standardized scores were converted into *Overall ratings out of 10* according to the formula:

$$OR = \mu + (\sigma * StanScore)$$

where OR is the resulting *Overall rating out of 10*, μ is the average calculated according to the formula:

$$\mu = (OR_{min} - 10 (Z_{min} / Z_{max})) / (1 - (Z_{min} / Z_{max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{max}$$

and StanScore is the standardized score calculated in (6) above and adjusted as required for minimum and maximum values as noted in (7) above. As noted in (7) above, OR_{min} equals zero, Z_{min} equals -3.29 ; and Z_{max} equals 2.2 .

- 9 Finally, the derived *Overall rating out of 10* is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating out of 10*, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

Appendix 2: Calculating the *Value-added* indicators

The Value-added indicators were calculated as follows:

- 1 For the grade-6 reading and grade-6 mathematics tests, the standardized results were regressed on two independent variables—parents' average education and the grade-3 standardized average level achieved by the students at the school in the same subject three years earlier—and the regression coefficients were determined (see tables below).
- 2 For each grade-6 test, the proportions of the standardized result associated with *Parents' average education (yrs)* and the relevant grade-3 standardized average level were deducted from the total, according to the formula:

$$G6_{Seff} = G6 - (b_{Ed} * EdMEP) - (b_{g3} * G3)$$

where $G6_{Seff}$ is the component of the grade-6 standardized results attributed to school effects; $G6$ is the actual, standardized grade-6 average level; b_{Ed} is the regression coefficient for parents' average education; $EdMEP$ is the actual parents' average education (yrs) at the school; b_{g3} is the grade-3 standardized average level regression coefficient; and, $G3$ is the actual grade-3 standardized average level.

- 3 The proportion of the grade-6 standardized average level attributed to school effects ($G6_{Seff}$) was standardized.
- 4 The standardized values of $G6_{Seff}$ for all the schools were sorted from highest to lowest and divided into quartiles.
- 5 The results were converted into a letter grade determined by the quartile into which each result was placed. Schools whose result fell in the 4th (highest scoring) quartile, received a letter grade of A; those in the 3rd quartile received a letter grade of B; those in the 2nd quartile received a letter grade of C; and, those in the 1st quartile (lowest scoring) received a letter grade of D.

The association of parents' average education (yrs) and 2004 grade-3 EQAO assessment results with 2007 grade-6 EQAO assessment results

Adjusted R Square	0.24
Standard Error	0.87
Observations	2533

	<i>Coefficients</i>	<i>t Stat</i>	<i>P-value</i>
Intercept	-3.99	-16.94	**
Parents' avg education (yrs)	0.27	16.97	**
2003 g3 avg. level in mathematics	0.30	16.02	**

Note: ** = significant at 99% level.

Note

Parents' average education is derived from the 2001 Census data aggregated to Statistic Canada's census Dissemination Area (DA). The data reported the average number of years of education of the most educated parent in student families. Data was weighted according to student enrollment by Dissemination Area. The Ontario Ministry of Education provided the necessary enrollment data.

About the authors

Peter Cowley

Peter Cowley is the Director of School Performance Studies at The Fraser Institute. He graduated from the University of British Columbia with a B.Comm. in 1974. Shortly thereafter, he began a long career in marketing and general management in several sectors. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. *The Parent's Guide* web site replaced the handbook in 1995.

In 1998, Mr Cowley was co-author of The Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed by *The 1999 Report Card on British Columbia's Secondary Schools*, *The 1999 Report Card on Alberta's High Schools*, and *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual report cards on Canadian schools. Annual editions now include report cards on secondary schools in British Columbia and Yukon, Alberta, Ontario, and Quebec and on elementary schools in British Columbia, Alberta, and Ontario as well as the bi-annual *Report Card on Aboriginal Education in British Columbia*.

Stephen T. Easton

Stephen T. Easton, in addition to being a Senior Scholar at the Fraser Institute, is a professor of Economics, a member of the School for International Studies, and an Associate member of the School of Criminology at Simon Fraser University. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. Recent works published by The Fraser Institute include *Marijuana Growth in British Columbia* (2004), *Privatizing Prisons* (editor, 1998), *The Costs of Crime: Who Pays and How Much? 1998 Update* (with Paul Brantingham, 1998), and *Rating Global Economic Freedom* (editor, 1992). A co-author of *A Secondary Schools Report Card for British Columbia* (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* of British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (Toronto: C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Berlin: Springer-Verlag, 1997) and *Education in Canada: An Analysis of Elementary, Secondary, and Vocational Schooling* (Vancouver: The Fraser Institute, 1988). His editorials have been carried by the *Vancouver Sun*, the *Globe and Mail*, the *National Post*, the *Ottawa Citizen*, the *Stirling* chain and many other newspapers around the country.

Acknowledgments

The authors wish to acknowledge the work of C. Robert Clements,
principal of Quinte Advocates, Belleville, Ontario.
Mr. Clements developed and applied part of the methodology
used in this *Report Card* prior to its introduction in 2003.
