

# Detailed school results

## How to read the tables

Use the sample table and the explanation of each line below to help you interpret the individual school results. Families choosing a school for their students should seek to confirm the *Report Card's* findings by visiting the school and interviewing teachers and school administrators. And, of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

**A→ Geographic Area:** Each of the schools in the Report Card has been assigned to a Geographic Area based on the city or town in which the school is located. Grouping schools in these Geographic Areas makes it easier to compare them. The Edmonton, Calgary, and Red Deer areas include only schools located in those cities; other areas may include schools in several differ-

ent cities or towns. To find the school that you are interested in, find the city or town in which it is located in the Index of Cities and Geographic Areas below and note the Geographic Area to which it has been assigned. Geographic Areas appear in the Detailed Tables in alphabetical order and the page number upon which the results for each group begin may be found in the List of Geographic Areas below. Within each Geographic Area, the schools are listed in order of their 2001 provincial ranking. Where schools are tied, they are listed in order of their provincial ranking for the past five years.

**B→Gr 12 Enrolment:** The number of regular day students enrolled in grade 12 as of September 30, 2000. Indicator results for small schools tend to be more variable than do those for larger schools and caution should be used in interpreting the results for smaller schools.

**C→School Name [Affiliation]:** The name of the school and its affiliation—public, separate, private, or francophone.

**D→Parents' average education (yrs.):** The average number of years of education of the most educated parent (or lone parent in a single parent family). Higher values of this statistic are commonly thought to be associated with better student performance. Use this statistic to identify schools at which the students share similar family backgrounds.

**E→Overall academic ranking:** The school's overall academic rank in the province for 2000-01 and

for the last five years. The rankings show how the school has done academically compared to the other schools in the province. A high ranking over five years indicates consistent strong results at the school.

**F→ Average exam mark:** The average mark (%) achieved by the students on all the school's grade 12 diploma examinations. Note that all the academic performance indicators—except the *Courses taken per student* and the *Overall rating out of 10*—are expressed as percentage points.

**G→ Percentage of exams failed:** The percentage of all the diploma examinations written by students at the school that received a grade below 50%.

**H→ School vs exam mark:** The difference (in percentage points) between the marks received from the school for diploma courses and the corresponding examination marks. Large differences usually indicate grade inflation by the school.

**I→ English 30 gender gap; J→ Math 30 gender gap:** The difference (in percentage points) between boys and girls in the extent to which their school marks in English 30 and Pure Mathematics 30 are different from their examination marks. Where the difference favours the girls, the value is preceded by an **F**; where boys are favoured, the value is preceded by an **M**. An **E** means that there is no difference between the girls and the boys on this measure. Most often, girls' school marks exceed their examination marks by more than is the case for boys' marks. This may mean either that girls do better on work assigned at the school or that school-based marking favours female students. Smaller differences indicate that the school is doing a good job for all its students.

**K→ Courses taken per student:** The average number of diploma courses completed by those students at the school who have completed their three years of high school. Taking more of these

diploma courses provides students with greater post-secondary opportunities.

**L→ Diploma completion rate:** The percentage of students, enrolled in grade 12 for the first time, who received a diploma in the same school year. Higher completion rates mean that the school is doing a good job of keeping students on track and focused on their work during their final year.

**M→ Overall rating out of 10:** The *Overall rating out of 10* takes into account the school's performance on all seven of these indicators (**F** to **L**) to answer the question, "In general, how is the school doing academically?" Schools may have different results in the seven indicators but the same overall rating. Here is an example.

	Henry Wise Wood High School	Edmonton Christian School
Grade 12 Enrolment	541	61
<b>Academic Performance (year)</b>	<b>2001</b>	<b>2001</b>
Average exam mark	68.7	65.6
Percentage of exams failed	10.8	14.8
School vs exam mark	2.7	4.6
English 30 gender gap	F 5.5	M 1.6
Math 30 gender gap	F 2.1	M 3.1
Courses taken per student	3.8	4.1
Diploma completion rate	72.3	78.7
<b>Overall rating out of 10</b>	<b>7.3</b>	<b>7.3</b>

**N→ Trend:** In the Trend column, "Up" at the end of an indicator row means that the school is probably improving on that indicator; "down" means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash (—) indicates that there is no significant change. Where insufficient data were available, "n/a" appears in the column. Note that for Percentage of exams failed, School vs exam mark, and the two Gender gap indicators, a downward trend in the data will lead to an "up" in the trend column. For example, a decreasing percentage of examinations failed indicates improvement and so "up" is displayed.

## Other notes

### Note 1

Not all of the province's high schools are included in the tables or the ranking. Of all the schools in the province reporting diploma examination results, 270 are included in this Report Card. Excluded are schools at which fewer than 15 regular day students were enrolled in grade 12 and schools that did not generate a sufficiently large set of student data to enable the calculation of an Overall rating out of 10. Also excluded from the ratings and rankings are centres for adult education and continuing education; schools that cater largely to non-resident foreign students; and certain alternative schools that do not offer a full program of courses. **The exclusion of a school from the Report Card should in no way be considered to be a judgement of the school's effectiveness.**

### Note 2

In accordance with its regulations regarding the privacy of personal information, where there were school results for less than six students, Alberta Learning provided no data.

### Note 3

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, "n/a" appears in the tables.

### Note 4

The results published in this *Report Card* are based on the same data from Alberta Learning that were used in previous years. However, several minor changes were made in the way that the data are analysed in order to ensure that results from all the years are comparable. Because they have been recalculated, some of the historical overall rating values in this edition will be different from those reported previously.

### Note 5

You can compare a school's results with these all-schools average results.
