Introduction

The *Report Card on Washington's Elementary Schools 2009* (hereafter, *Report Card*) collects a variety of relevant, objective indicators of school performance into one easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their schools.

The *Report Card* helps parents choose

Where parents can choose among several schools for their children, the *Report Card* provides a valuable tool for making a decision. Because it makes comparisons easy, it alerts parents to those nearby schools that appear to have more effective academic programs. Parents can also determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they visit schools under consideration and speak with the staff.

Of course, the choice of a school should not be made solely on the basis of a single source of information. Web sites maintained by Washington's Office of Superintendent of Public Instruction (OSPI)¹, local school boards, and individual schools may also provide useful information.² Parents who already have a child enrolled at the school provide another point of view.

Naturally, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. Nevertheless, the *Report Card* provides a detailed picture of each school.

The *Report Card* facilitates school improvement

The act of publicly rating and ranking schools attracts attention, and this can provide motivation. Schools that perform well or show consistent improvement are applauded. Poorly performing schools generate concern, as do those whose performance is deteriorating. This inevitable attention provides an incentive for all those connected with a school to focus on student results.

However, the *Report Card* offers more than just incentive. It includes a variety of indicators, each of which reports results for an aspect of school performance that may be improved. School administrators who are dedicated to their students' academic success accept the *Report Card* as another source of opportunities for improvement.

Some schools do better than others

To improve a school, one must believe that improvement is achievable. This *Report Card*, like other report cards from the Fraser Institute, provides evidence about what can be accomplished. It demonstrates clearly that, even when we take into account factors such as the students' family background—which some believe dictate the degree of academic success that students can enjoy in school—some schools do better than others. This finding confirms the results of research carried out in other countries.³ Indeed, it will come as no great surprise to experienced parents and educators that the data consistently suggest that what goes on in the schools makes a difference to academic results and that some schools make a greater difference than others.

Comparisons are at the heart of the improvement process

By comparing a school's latest results with those of earlier years, we can see if the school is improving. By comparing a school's results with those of neighboring schools or schools having similar school and student characteristics, we can identify more successful schools and learn from them. Reference to statewide results places an individual school's level of achievement in a broader context.

There is great benefit in identifying schools that are particularly effective. By studying the techniques used in schools where students are successful, less effective schools may find ways to improve. This advantage is not lost on the United Kingdom's Department of Education and Skills. Its "Leading Edge" program⁴ helps educators connect with others

who have expertise in particular areas of instruction and school administration.

Comparisons are at the heart of improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card's* indicators, ratings, and rankings.

You can contribute to the development of the *Report Card*

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please contact the Evergreen Freedom Foundation's Steven Maggi at 360.956.3482 or the Fraser Institute's Peter Cowley at 604.714.4556.

Key academic indicators of school performance

The foundation of the *Report Card* is an overall rating of each school's academic performance. We base our *Overall rating out of 10* on the school's performance on seven indicators, all of which are derived from results on the Washington Assessment of Student Learning (WASL) in reading, writing, mathematics, and science skills and knowledge that are administered for the OSPI.⁵

- (1) average level of achievement on the WASL in reading at grades 3, 4, 5, and 6;
- (2) average level of achievement on the grade-4 WASL in writing;
- (3) average level of achievement on the WASL in mathematics at grades 3, 4, 5, and 6;
- (4) average level of achievement on the grade-5 WASL in science;
- (5) the percentage of WASL assessments that were failed.
- (6) the difference between low-income and non-low-income students in their average levels of achievement on the WASL in grade-5 reading;
- (7) the difference between low-income and non-low-income in their average levels of achievement on the WASL in grade-5 mathematics;

We have selected this set of indicators because they provide systematic insight into a school's performance. Because they are based on annually generated data, we can assess not only each school's performance in a year but also its improvement or deterioration over time.

Indicators of effective teaching

Average levels of achievement on WASL assessments

These indicators—in the tables, *Avg. level*—show the combined average level of proficiency achieved by the school's students on the uniform WASL assessments in reading, writing, mathematics, and science at all applicable grade levels. The OSPI converts the raw score on each test into a level of achievement from 1 to 4 as well as a fifth level (Level Basic) assigned to the results of certain students who have required a special education program. Achievement at Levels 1 and 2 suggest that the student has not yet met the state standard. Level Basic and Level 3 are considered to have met the state standard and Level 4 represents achievement well above the state standard. Achievement at Level 3 or 4 suggests that students are well prepared for work at the next grade.

To calculate the average level achieved by the students at a school on any given test, a numerical value is given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level Basic, a value of 2; Level 3, a value of 3; and Level 4, a value of 4.

Each of the four *Average level* indicators takes into account the results on tests administered to students in grades 3, 4, 5, and 6. For example, in a school that only enrolls students in grades K to 3, these indicators will take into account only the results of tests written in grade 3. On the other hand, for schools that enroll students in grades K through 6, these indicators will take into account the results of tests written in grades 3, 4, 5, and 6.

Fundamental to the mission of elementary schools is teaching students sound basic skills in reading, writ-

ing, and mathematics. Basic literacy and numeracy are essential building blocks for life-long learning. The tests upon which the *Report Card* is based assess students on these dimensions. Differences among students in abilities, motivation, and work habits will inevitably have some impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on the WASL tests. There is also variation within schools in the results obtained in different subject areas and at different grades. Such differences in outcomes cannot be wholly explained by the individual and family characteristics of the school's students. It seems reasonable, therefore, to include the average test marks in these four critical subject areas as indicators of effective teaching.

Percentage of WASL tests below standard

For each school, this indicator—in the tables *Tests below standard (%)*—provides the rate of failure on the WASL tests. It is derived by dividing the total number of all the above tests that provided enough information to enable the calculation of a score but that did not meet the state standard, by the total number of such tests written by the students at the school.

Since reading, writing, mathematics, and basic science are all important to students' further intellectual and personal development, students should, at the minimum, demonstrate that they meet the accepted standard of performance for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take student differences into account? The Low-income gap indicators

The Low-income gap indicators—in the tables *Low-income gap (level)*—use the grade-5 results of the WASL assessments to determine how successful the school has been in narrowing the achievement gap between low-income and non-low-income students in

reading and mathematics. For the 2007/2008 school year, low-income is defined as a household income of less than \$38,203 per annum.⁶ These indicators are determined, for each subject area, by calculating the absolute value of the difference between low-income and non-low-income students in their average level of achievement. The more successful group is reported along with the difference in the detailed tables.

Undoubtedly, some personal and family characteristics, left unmitigated, can have a deleterious effect on a student's academic development. The *Report Cards* provide evidence that successful teachers overcome such impediments. By comparing the results of low-income and non-low-income students in two subject areas—reading and mathematics—in which one group or the other may have enjoyed an historical advantage, we are able to gauge the extent to which schools provide effective teaching to all of their students.

In general, how is the school doing academically compared to other schools in the Report Card? The Overall rating out of 10

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance, we need an overall indicator of school performance—in the tables *Overall rating out of 10*. Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall rating. The overall rating of school performance answers the question, "In general, how is the school doing academically, compared to other schools in the report card?"

To derive this rating, the results for each of the seven indicators, for each school year, were first standardized. Standardization is a statistical procedure whereby sets of raw data with different characteristics are converted into sets of values sharing certain statistical properties. Standardized values can readily be

combined and compared. The standardized data were then weighted and combined to produce an overall standardized score. Finally, this score was converted into an overall rating out of 10. It is from this *Overall rating out of 10* that the school's statewide rank is determined.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, it measures each school's performance compared to all the other schools in the state. Thus, even though a school receives an overall rating of 10, it is very likely that it can still improve. An overall rating of zero means that on average, on the report card's indicators, no school in the state performed more poorly.

However, it does not mean that the lowest performing school has accomplished nothing for its students.

Further, because it is a relative measure, for a school to show improvement in its Overall rating out of 10, it must improve faster than the average. If it improves, but at a rate lower than the average, it will show a decline in its rating.

For schools where there were fewer than 15 test results for low-income students or for non-low-income students, no values for the *Low-income gap* indicators can be provided. In these cases the *Overall rating out of 10* is derived using the remaining indicators. (See Appendix 1 for an explanation of the calculation of the *Overall rating out of 10*.)

Other indicators of school performance

The *Report Card* includes other indicators that, while they are not used to derive the *Overall rating out of 10*, add more information on the school's effectiveness.

The *Tests not written* indicator

Schools that administer the WASL assessments are expected to ensure that all their students take the tests. Higher participation rates provide the benefit of objective assessment of learning to more students and parents. They also provide a more accurate reflection of the level of achievement at the school. A reader can have more confidence that the test results are a true reflection of the school's average achievement level if all, or almost all, of its students take the tests.

The indicator of tests not written—in the tables *Tests not written, not exempt (%)*—was determined by first summing, for each of the test sittings, the number of students for whom no test data were submitted. These sums were then totaled. This result was then divided by the total number of tests that could have been completed if all students had fully participated in all of the tests that were administered at the school.

The principal of a school at which a relatively large percentage of students did not complete the tests should be able to provide good reasons for the students' failure to do so and a well-developed plan to increase participation in future test sittings.

The *Trend* indicator

Is the school improving academically? The *Report Card* provides five years of data for most schools.

Unlike a snapshot of one year's results, this historical record provides evidence of change (or lack thereof) over time.

To detect trends in the performance indicators, we developed the Trend indicator. This indicator uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. To calculate the trends, the standardized scores rather than raw data are used. Standardizing makes historical data more comparable and the trend measurement more reliable. Because calculation of trends is uncertain when only a small number of data points is available, a trend is indicated only in those circumstances where five years of data are available and where the trend is statistically significant. For this indicator, we have defined the term "statistically significant" to mean that, nine times out of 10, the trend that is noted is real; that is, it did not happen just by chance.

The socioeconomic indicator

Educators can and should take into account the abilities, interests, and backgrounds of their students when they design lesson plans and teach the curriculum. By doing so, they can overcome disadvantages that their students may have. The socioeconomic indicator enables us to identify schools that are roughly similar to each other with respect to the financial circumstances of their students' families so that their results can be compared. Effective schools produce good results regardless of the family background of their students.

For this edition of the *Report Card*, we use the percentage of students from low-income families as

calculated for eligibility to receive free or reduced-price lunch at school as the socioeconomic indicator.

Previous studies⁶ have shown that variations in student results from school to school cannot be accounted for solely by the personal and family characteristics of a school's students. Many other factors—including good teaching, counseling, and school administration—contribute to the effectiveness of schools. Indicators like *Low income* describe

past relationships between a socioeconomic characteristic and a measure of school effectiveness. It should not be inferred that these relationships will, or should, remain static. The more successfully schools enable all their students to succeed, the weaker will be the relationship between the family characteristics of students and their academic success. Thus, this socioeconomic indicator should not be used as an excuse for poor school performance.

Notes

- 1 The Office of Superintendent of Public Instruction (OSPI) is the primary government agency charged with overseeing K-12 education in the state of Washington. For more, information, see the OSPI website at <<http://www.k12.wa.us>>.
- 2 See, for example, the website of Seattle Public Schools at <<http://www.seattleschools.org>>.
- 3 See, for instance, Michael Rutter et al., *Fifteen Thousand Hours: Secondary Schools and Their Effects on Children* (Cambridge, MA: Harvard University Press, 1979) and Peter Mortimore et al., *School Matters: The Junior Years* (Wells, Somerset: Open Books, 1988).
- 4 See the website of *Leading Edge* at <<http://www.standards.dfes.gov.uk/leadingedge/>> (as of April 13, 2009).
- 5 The WASL test results, student enrollment data, and school information used or reported in this publication were provided by the Office of Superintendent of Public Instruction. The results or views expressed in this publication are those of the authors and are not those of the Office of Superintendent of Public Instruction.
- 6 The percentage of low-income student families is derived from enrollment data provided by OSPI.

In this case, low-income is defined in terms of the eligibility of the student for free or reduced-cost meals at school. Students are eligible for free or reduced-cost meals if their household income is equal to or less than the US Department of Health and Human Services 2007 poverty guidelines income cutoff for families with a specified household size.

For example, in Washington, for the 2007/2008 school year, the children in a household of four would be eligible for a) free meals or, b) reduced cost meals at school if the household income was a) at the maximum 130% of the poverty guidelines income cutoff (\$26,845) or, b) at the maximum 185% of the poverty guidelines income cutoff (\$38,203) respectively.

For further information see, United States Department of Health and Human Services: The 2007 HHS Poverty Guidelines-One Version of the [U.S.] Federal Poverty Measure at: <<http://aspe.hhs.gov/POVERTY/09poverty.shtml>>, National School Lunch and School Breakfast Programs, OSPI, at <<http://www.k12.wa.us/ChildNutrition/NSLSBP.aspx>>, and <<http://www.k12.wa.us/ChildNutrition/pubdocs/forms/NSLSBPforms2007-08/ExhibitI.doc>>.

Detailed school reports

How to read these tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their children should seek to confirm the *Report Card's* findings by visiting the school and interviewing teachers, school administrators, and other parents. The complete *Report Card* can be downloaded free of charge from <<http://www.compareschoolrankings.org>>. More information regarding test results at individual schools can be found on the Office of Superintendent of Public Instruction (OSPI) web site at <<http://www.k12.wa.us/>> and on the web sites of local school districts and schools. Of course, a sound aca-

demic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

Private schools are not required to administer the WASL tests. Since the *Report Card* is based on results achieved on these tests no private schools tests could be included.

IMPORTANT: In order to get the most from the *Report Card*, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

A – GEOGRAPHICAL AREA							
B –	School name [Public] City		Grades: K-6		Enrollment: 328		
C –	Low income: 70.9%		Ethnicity: Wh: 89.6% Hi: 4.0%		2007-08 Last 5 yrs		
D –	Tests not written not exempt: 0.0%		Rank: 989/1130		907/1037		
	Academic Performance	2004	2005	2006	2007	2008	Trends
E –	Avg level: Reading	2.6	2.7	2.7	2.6	2.6	▲
F –	Writing	n/a	2.2	2.3	2.5	2.4	n/a
G –	Math	2.0	2.2	2.2	2.2	2.3	—
H –	Science	2.0	2.0	2.0	1.9	2.1	▼
I –	Tests below standard (%)	64.8	55.9	55.6	51.4	51.9	—
J –	Low-income gap: Reading	n/a	n/a	n/a	n/a	n/a	n/a
K –	Math	n/a	n/a	n/a	n/a	n/a	n/a
L –	Overall rating out of 10	4.2	4.0	3.9	3.9	3.9	▼

A — The schools are grouped into geographical areas. To find a school's results, find its location in the "List of cities and geographical areas" and note its geographical area. Find the geographical area in the "Index of geographical areas" and note the page on which its results begin. Within each geographical area, the schools are listed in alphabetical order.

B (left) — The school name, its affiliation—public,

charter, or tribal—and the city in which the school is located.

B (middle) — The grade range at the school.

B (right) — The number of students enrolled at the school.

C (left) — The percentage of the students at the

school who were from low-income families based on their eligibility for free or reduced-cost lunch.

C (right) — The percentage of the students belonging to each of the two largest ethnic groups at the school.

D (left) — The percentage of tests that could have been taken at the school but were not. This percentage does not include tests not taken because the students were exempt.

D (right) — The school's overall academic rank in the state for 2007/2008 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the report card. A high ranking over five years indicates consistently strong results at the school.

E through H — The average level achieved by the students on all the tests administered in grades 3 through 6 in the indicated subject areas. The OSPI assigns a level of achievement to each completed test. Achievement at Levels 1 and 2 suggest that the student has not yet met the state standard. Level 3 is considered the state standard and Level 4 represents achievement well above the expected level. Thus, achievement at Level 3 or 4 suggests that students are well prepared for work at the next grade. In order to calculate the average level, a numerical value was given to each level of achievement. Thus, Level 1 was given a value of 1 for purposes of determining the average; Level 2, a value of 2; Level 3, a value of 3; and Level 4, a value of 4.

I — The percentage of all the completed tests taken by students at the school that were judged to be below standard. A low percentage of *Tests below standard* indicates that the school is successful in ensuring that most of its students are meeting or exceeding the state standard of performance.

J and K — The difference (in average level of achievement) between students from low-income families and those from non-low-income families

on the grade 5 reading and math tests. Where the difference favors the students from low-income families, the value is preceded by an L. Where students from non-low-income families are favored, the value is preceded by an N. An E means that there is no difference between these two student groups on this measure. Smaller differences indicate that the school is doing a good job for all its students.

L — The *Overall rating out of 10* takes into account the indicators described in E through K above to answer the question, "In general, how is the school doing academically compared to other schools in the *Report Card*?"

Important note: The *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating out of 10*, it must improve more rapidly than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

M — An upward-pointing arrow at the end of an indicator row means that the school is probably improving on that indicator. A downward-pointing arrow means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before indicating a trend. A dash indicates that there is no significant change. Where insufficient data were available, "n/a" appears in the column. Note that for the two *Low-income gap* indicators and *Tests below standard* a downward trend in the data will lead to an upward-pointing arrow in the trend column. For example, a decreasing *Tests below standard (%)* indicates improvement and so an upward-pointing arrow is displayed.

Other notes

Note 1

Not all the state's elementary schools are included in the tables or the ranking. To be included, schools

must have had, in the school year 2007/2008, at least 15 students in any of grades 3, 4, or 5. Private schools are not required to administer the OSPI tests. Since the results of these tests form the basis for this *Report Card*, no private schools are included. Finally, also excluded are schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10*.

The exclusion of a school from the *Report Card* is not a judgement of the school's effectiveness.

Note 2

The OSPI's test results, student enrollment data, and school information used or reported in this publication were provided by the Office of Superintendent of Public Instruction. The results or views expressed in this publication are those of the authors and are not those of the Office of Superintendent of Public Instruction.

Note 3

In accordance with its regulations regarding the privacy of personal information, where the results in a test involved fewer than 10 students, the EQAO provided no data.

Note 4

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, "n/a" appears in the tables.

Note 5

You can compare a school's results with these all-schools average results in the table below.

Note 6

If you have questions about the *Report Card*, contact the Evergreen Freedom Foundation's Steven Maggi at 360.956.3482 or the Fraser Institute's Peter Cowley at 604.714.4556.

Average values for all schools 2007/2008		Enrollment: 439					
Average Low-income: 42.9%							
Average Tests not written not exempt (%): 1.6							
Academic Performance		2004	2005	2006	2007	2008	Trend
Avg level:	Reading	3.0	3.1	3.0	3.0	3.0	-
	Writing	n/a	2.6	2.6	2.6	2.7	n/a
	Math	2.7	2.7	2.6	2.7	2.7	-
	Science	2.0	2.1	2.2	2.2	2.3	▲
Tests below standard (%)		45.4	42.0	37.9	37.2	37.0	▲
Low income gap: Reading		n/a	n/a	n/a	n/a	0.5	n/a
Math		n/a	n/a	n/a	n/a	0.6	n/a
Overall rating out of 10		6.0	6.0	6.0	6.0	6.0	-

* These results reflect the average size of the low income gaps in 2007-2008. The Reading low income gap favored non-low income students at 94.6% of schools, low income students at 3.0% of schools, and was even at 2.4% of schools. The Math low income gap favored non-low income students at 96.4% of schools, low income students at 1.6% of schools, and was even at 2.0% of schools.

Ranking the schools

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 1127) according to their academic performance as measured by the *Overall rating out of 10* (shown on the right hand side of the table) for the school year 2007/2008. Each school's five-year average ranking and *Overall rating out of 10* are also listed. The higher the overall school rating (out of 10), the higher the rank awarded to the school. Where schools tied in the overall rating, they were awarded the same rank. Where fewer than four years of data were available "n/a" appears in the table.

State rank		School name	City	Overall rating	
2007/2008	Last 5 years			2007/2008	Last 5 years
1	1	Cedar Wood	Bothell	10.0	10.0

26	20	Benjamin Franklin	Kirkland	9.6	9.5
26	22	Whittier	Seattle	9.6	9.4
30	16	Cherry Crest	Bellevue	9.5	9.6

Not all the state's elementary schools are included in the tables or the ranking. Of all the schools in the state reporting WASL results, 1130 are included in this *Report Card*. Included are schools that enrolled at least 15 students in at least one of grades 3, 4, 5, or 6. Excluded are those schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10* for the school year 2007/2008.

The exclusion of a school from the *Report Card* should not be construed as a judgement of the school's effectiveness.

Appendix 1: Calculating the *Overall rating out of 10*

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing academically compared to other schools in the *Report Card*?” The following is a simplified description of the procedure used to convert the data received from the Office of Superintendent of Public Instruction into the *Overall rating out of 10*.

- 1 Subject by subject, and grade-level by grade-level, the *Average levels* and *Tests below standard* values for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 The subject-by-subject standardized data for *Average levels* and *Tests below standard* were then aggregated to produce a weighted average standardized value. The weighting used was the number of student writers in each subject relative to the total number of student writers of the relevant tests.
- 3 These two weighted average results were then re-standardized.
- 4 The *Low income gap* values in grade-5 reading and mathematics were each calculated by determining the absolute value of the difference in the level of achievement of male students and female students at the school. The results for each subject were then standardized.
- 5 The four standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weightings used in these calculations were: *Average level* 50%; *Low-income gap* for each of the grade-6 reading and grade-6 mathematics tests: 10%; *Tests below standard*—30%. For schools for which there were no low-income gap results, the weightings used were: *Average level* 62.5%; *Tests below standard*—37.5%.
- 6 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 7 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to

denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 8 The resulting standardized scores were converted into *Overall ratings out of 10* according to the formula:

$$OR = \mu + (\sigma * StanScore)$$

where OR is the resulting *Overall rating out of 10*, μ is the average calculated according to the formula:

$$\mu = (OR_{min} - 10 (Z_{min} / Z_{max})) / (1 - (Z_{min} / Z_{max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{max}$$

and StanScore is the standardized score calculated in (6) above and adjusted as required for minimum and maximum values as noted in (7) above. As noted in (7) above, OR_{min} equals zero, Z_{min} equals -3.29 ; and Z_{max} equals 2.2 .

- 9 Finally, the derived *Overall rating out of 10* is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its *Overall rating out of 10*, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

About the authors

Diana Cieslak

Diana Cieslak is a policy analyst for the Education Reform Center and Citizenship & Governance Center at the Evergreen Freedom Foundation. In addition to serving as Director of the Report Card Project on Washington's Schools, she researches and writes on public policy issues relating to education, elections, and American History. Ms. Cieslak graduated with academic honors from Hillsdale College with a B.A. in History and a minor in French as well as secondary teaching credentials in both subjects. While at Hillsdale, she served on the Board of Academic Honesty, coordinated a community child literacy program, and conducted research on the issue of adult literacy. Her interest in public education was piqued during her semester of student teaching in a low-income high school in rural Michigan. She received French language training at L'Institute de Touraine in France's Loire Valley and studied British History at Oxford University. Following graduation, Ms. Cieslak taught middle school humanities, among other subjects, at a classical school in Seattle where she developed two primary text-based, interdisciplinary humanities curricula.

Peter Cowley

Peter Cowley is the Director of School Performance Studies at The Fraser Institute. He graduated from the University of British Columbia with a B.Comm. in 1974. Shortly thereafter, he began a long career in marketing and general management in several sectors. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr. Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of secondary-school students in the Canadian province of British Columbia. *The Parent's Guide* web site replaced the handbook in 1995.

In 1998, Mr. Cowley was co-author of The Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed by *The 1999 Report Card on British Columbia's Secondary Schools*, *The 1999 Report Card on Alberta's High Schools*, and *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*. Since then, Mr. Cowley has co-authored all of the Institute's annual report cards on Canadian schools. Annual editions now include report cards on secondary schools in British Columbia and Yukon, Alberta, Ontario, and Quebec and on elementary schools in British Columbia, Alberta, and Ontario as well as the bi-annual *Report Card on Aboriginal Education in British Columbia*. This edition begins a series of report cards on Washington schools.

Stephen T. Easton

Stephen T. Easton in addition to being a Senior Scholar at the Fraser Institute, is a professor of Economics, a member of the School for International Studies, and an Associate member of the School of Criminology at Simon Fraser University. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. Recent works published by the Fraser Institute include *Marijuana Growth in British Columbia* (2004), *Privatizing Prisons* (editor, 1998), *The Costs of Crime: Who Pays and How Much? 1998 Update* (with Paul Brantingham, 1998), and *Rating Global Economic Freedom* (editor, 1992). A co-author of *A Secondary Schools Report Card for*

British Columbia (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* for British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Springer-Verlag, 1997), and *Education in Canada: An Analysis of Elementary, Secondary, and Vocational Schooling* (The Fraser Institute, 1988). His editorials have been carried by the *Vancouver Sun*, the *Globe and Mail*, the *National Post*, the *Ottawa Citizen*, the Stirling chain and many other newspapers around the country.

About this publication

Studies in Education Policy are published periodically throughout the year by the Fraser Institute.

Distribution

These publications are available from <<http://www.fraserinstitute.org>> and <www.fraseramerica.org> in Portable Document Format (PDF) and can be read with Adobe Acrobat® or with Adobe Reader®, which is available free of charge from Adobe Systems Inc. To download Adobe Reader, go to this link: <<http://get.adobe.com/reader/>> with your browser. We encourage you to install the most recent version.

About the Fraser Institute

Our vision is a free and prosperous world where individuals benefit from greater choice, competitive markets, and personal responsibility. Our mission is to measure, study, and communicate the impact of competitive markets and government interventions on the welfare of individuals.

Founded in 1974, we are an independent research and educational organization with locations throughout North America and international partners in over 70 countries. Our work is financed by tax-deductible contributions from thousands of individuals, organizations, and foundations. In order to protect its independence, the Institute does not accept grants from government or contracts for research.

菲沙研究所的願景乃一自由而昌盛的世界，當中每個人得以從更豐富的選擇、具競爭性的市場及自我承擔責任而獲益。我們的使命在於量度、研究並使人知悉競爭市場及政府干預對個人福祉的影響。

Nous envisageons un monde libre et prospère, où chaque personne bénéficie d'un plus grand choix, de marchés concurrentiels et de responsabilités individuelles. Notre mission consiste à mesurer, à étudier et à communiquer l'effet des marchés concurrentiels et des interventions gouvernementales sur le bien-être des individus.

تتمثل رؤيتنا في وجود عالم حر ومزدهر يستفيد فيه الأفراد من القدرة على الاختيار بشكل أكبر، والأسواق التنافسية، والمسؤولية الشخصية. أما رسالتنا فهي قياس، ودراسة، وتوصيل تأثير الأسواق التنافسية والتدخلات الحكومية المتعلقة بالرفاه الاجتماعي للأفراد.

Nuestra visión es un mundo libre y próspero donde los individuos se benefician de una mayor oferta, la competencia en los mercados y la responsabilidad individual. Nuestra misión es medir, estudiar y comunicar el impacto de la competencia en los mercados y la intervención gubernamental en el bienestar de los individuos.
