Introduction

The *Report Card on British Columbia's Elementary Schools 2016* (hereafter, *Report Card*) collects a variety of relevant, objective indicators of school performance into one, easily accessible public document so that anyone can analyze and compare the performance of individual schools. By doing so, the *Report Card* assists parents when they choose a school for their children and encourages and assists all those seeking to improve their schools.

The Report Card helps parents choose

Where parents can choose among several schools for their children, the *Report Card* provides a valuable tool for making a decision. Because it makes comparisons easy, it alerts parents to those nearby schools that appear to have more effective academic programs. Parents can also determine whether schools of interest are improving over time. By first studying the *Report Card*, parents will be better prepared to ask relevant questions when they visit schools under consideration and speak with the staff.

Of course, the choice of a school should not be made solely on the basis of any one source of information. A tour of each school of interest and an interview with the principal can be useful. Parents who already have a child enrolled at the school can provide another point of view. And, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*. Nevertheless, the *Report Card* provides a detailed picture of each school that is not easily available elsewhere.

The Report Card encourages schools to improve

The act of publicly rating and ranking schools attracts attention and can provide motivation. Schools that perform well or show consistent improvement are applauded. Poorly performing schools generate concern, as do those whose performance is deteriorating. This inevitable attention provides one more incentive for all those connected with a school to focus on student results.

The *Report Card*, however, offers more than incentive: it includes a variety of indicators, each of which reports results for an aspect of school performance that might be improved. School administrators who are dedicated to improvement accept the *Report Card* as another source of opportunities for improvement.

Some schools do better than others

To improve a school, one must believe that improvement is achievable. This *Report Card* provides evidence about what can be accomplished. It demonstrates clearly that, even when we take into account factors such as the students' family background, which some believe dictate the degree of academic success that students will have in school, some schools do better than others. This finding confirms the results of research carried out in other countries.¹ Indeed, it will come as no great surprise to experienced parents and educators that the data consistently suggest that what goes on in the schools makes a difference to academic results and that some schools make more of a difference than others.

Comparisons are the key to improvement

By comparing a school's latest results with those of earlier years, we can see if the school is improving. By comparing a school's results with those of neighbouring schools or of schools with similar school and student characteristics, we can identify more successful schools and learn from them. Reference to overall provincial results places an individual school's level of achievement in a broader context.

Comparisons are the key to improvement: making comparisons among schools is made simpler and more meaningful by the *Report Card's* indicators, ratings, and

rankings. Comparisons among schools can be made more easily by using the Institute's school rankings website, <<http://www.compareschoolrankings.org>>.

You can contribute to the development of the *Report Card*

The *Report Card* program benefits from the input of interested parties. We welcome your suggestions, comments, and criticisms. Please contact Peter Cowley at peter.cowley@fraserinstitute.org.

Elementary schools included in this report

This edition of the *Report Card* includes two types of elementary schools. The majority of the schools (649 out of 944) enroll both grade-4 and grade-7 students. An additional 295 elementary schools that do not enroll grade-7 students (hereafter referred to as “Type-2 schools”) are also included. The students who attend these elementary schools generally move to a middle school or junior high school after completing the highest grade (usually grade 5 or grade 6) that the school offers. Type 2 schools are identified in the detailed school reports and in the ranking table with double daggers (††) immediately following each Type 2 school’s name.

The procedure for determining the indicator values, ratings, and rankings for the two types of schools is the same with one important exception. Because Type-2 schools have no grade-7 enrollment, they do not generate the grade-7 level provincewide test results that are used in seven of this *Report Card*’s academic indicators. However, students who were enrolled in Type-2 schools participate in the grade-7 test sittings—usually at a middle school—a year or two after they have left their elementary school. The Ministry of Education provides grade-7 level data required for the calculation of the indicators grouped by the school at which the students were enrolled in grade 4 rather than by the school at which the students had written the grade-7 tests. We are, therefore, able to attribute to each Type-2 school the grade-7 level test results of the students who attended grade 4 at the school.

We believe it is reasonable to make this attribution. In districts where Type-2 elementary schools operate, parents are able to compare academic performance at a

combination of two schools—grades 1 through 5 at the elementary school and grades 6 and 7 at the middle school—with academic performance at Type-1 schools in the same and other districts.

Of course, the staff at Type-2 schools could argue that, since they cannot influence the effectiveness of learning outside their own school, they cannot be held responsible for the grade-7 results of their former students now attending a middle school. To some extent, this may be true. However, in many cases the Type-2 school has been responsible for the child’s academic development for five years and it is reasonable to assume that effective teaching during that period would benefit students as they move through their studies at middle school. Further, it is likely that the administrators in districts where middle schools are established have developed liaison programs to ensure that student progress continues uninterrupted by the transition from elementary to middle schools.

Further, we cannot be certain that all the grade-4 students at a Type-2 school moved to the same school for grade 7. In some cases, students will have two or more middle schools from which to choose. Some students may move to private schools offering a greater grade range. Still others may choose to attend a Type-1 school in a neighbouring district. However, there is no reason to believe that the ability to choose from a variety of grade-7 schools will effect a particular Type-2 school’s results systematically.

Readers reviewing the results for Type-2 schools should bear in mind that they reflect the combined effect of both the elementary school and the middle schools that its students subsequently attend.

Key academic indicators of school performance

The foundation of the *Report Card* is an overall rating of each school's academic performance. We base our Overall rating on ten indicators:

1. average *Foundation Skills Assessment*² (FSA) score in grade-4 reading;
2. average FSA score in grade-4 writing;
3. average FSA score in grade-4 numeracy;
4. average FSA score in grade-7 reading;
5. average FSA score in grade-7 writing;
6. average FSA score in grade-7 numeracy;
7. the difference between male and female students in their average FSA scores in grade-7 reading;
8. the difference between male and female students in their average FSA scores in grade-7 numeracy;
9. the percentage of the above tests written by the school's students that were judged to reflect performance below expectations;
10. the percentage of the tests that could have been written by students who were absent, exempted from writing the test or, for any other reason, did not provide a meaningful response to the test.

We have selected this set of indicators because they provide systematic insight into a school's performance. Because they are based on annually generated data, we can assess not only each school's performance in a year but also its improvement or deterioration over time.

Indicators of effective teaching

Average FSA scores

These indicators (in the tables, *avg score*) show how well each school's students performed compared to students in all other schools on the uniform FSA tests

in reading, writing, and numeracy at the grade-4 and grade-7 levels.

Fundamental to the mission of elementary schools is teaching its students the basic skills of reading, writing, and mathematics. These skills are essential building blocks for life-long learning. The tests upon which the *Report Card* is based are designed to achieve a distribution of results reflecting the differences in students' mastery of the skills embodied in the curriculum. Differences among students in abilities, motivation, and work-habits will inevitably have some impact upon the final results. There are, however, recognizable differences from school to school within a district in the average results on the FSA tests. There is also variation within schools in the results obtained in different skills areas and at different grade levels. Such differences in outcomes cannot be wholly explained by the individual and family characteristics of the school's students. It seems reasonable, therefore, to include the average test marks in these three critical subject areas as indicators of effective teaching.

Percentage of FSA tests Below expectations

For each school, this indicator (in the tables, *Below expectations (%)*) measures the extent to which the school's students fail to meet the expected standard of performance on the FSA tests. It was derived by dividing the total number of all the tests in reading, writing and numeracy that were assigned the lowest achievement level—not yet meeting expectations—by the total number of such tests that were assigned any of the three achievement levels: not yet meeting expectations, meeting expectations, and exceeding expectations.

Since reading, writing, and mathematics are critical to students' further intellectual and personal development, students should, at the minimum, be

able to demonstrate that they meet the expected level of achievement for their grade in these subject areas. Schools have the responsibility of ensuring that their students are adequately prepared to do so.

How well do the teachers take student differences into account?

The Gender gap indicators

The Gender gap indicators (in the tables, *gender gap*) use the grade-7 FSA results to determine how successful the school has been—compared to all the other schools—in narrowing the achievement gap between male and female students in reading and numeracy.³ They are calculated by determining the absolute value of the difference in the average scores achieved by girls and boys on the grade-7 reading and numeracy tests. The differences in score units are reported as well as the favoured sex.

Undoubtedly, some personal and family characteristics, left unmitigated, can have a deleterious effect on a student's academic development. However, the *Report Card* provides evidence that successful teachers overcome any such impediments. By comparing the results of male and female students in two subject areas—reading and numeracy—in which one group or the other has apparently enjoyed a historical advantage, we are able to gauge the extent to which schools provide effective teaching to all of their students.

The Tests not written indicator

The student participation indicator (in the tables, Tests not written (%)) was determined by first summing, for each of the six test sittings, the total number of tests that could have been written by students at the school but which, for whatever reason, were either not written or did not include a meaningful response. The six sums were then totaled. This result was then divided by the total number of tests that could have been completed if all students had fully participated in all of the tests that were administered at the school.

Schools that administer the FSA assessments are expected to ensure that all their students write the

tests. Higher participation rates provide the benefit of objective assessment of learning to more parents. They also provide a more accurate reflection of the level of achievement at the school. A reader can have more confidence that the test results are a true reflection of the school's average achievement level if more of its students write the tests. The principal of a school at which a relatively large percentage of students did not complete the tests should be able to provide good reasons for the students' failure to do so and a well-developed plan to increase participation in future test sittings.

In general, how is the school doing, academically?

The Overall rating out of 10

While each of the indicators is important, it is almost always the case that any school does better on some indicators than on others. So, just as a teacher must make a decision about a student's overall performance, we need an overall indicator of school performance (in the tables, Overall rating out of 10). Just as teachers combine test scores, homework, and class participation to rate a student, we have combined all the indicators to produce an overall rating. This overall rating of school performance answers the question, "In general, how is the school doing academically compared to other schools in the *Report Card*?"

To derive this rating, the results for each of the ten indicators, for each school year for which data were available, were first standardized. Standardization is a statistical procedure whereby sets of data with different characteristics are converted into sets of values sharing certain statistical properties. Standardized values can readily be combined and compared.

The standardized data were then weighted and combined to produce an overall standardized score. Finally, this score was converted into an Overall rating out of 10. It is from this Overall rating out of 10 that the school's provincial rank is determined.

For schools where only boys or girls were enrolled, there are, of course, no results for the Gender gap indicators. In these cases the Overall rating out of 10 is derived using the remaining indicators. (See Appendix 1 for an explanation of the calculation of the Overall rating.)

Other indicators of school performance

The *Report Card* includes several other indicators that, while they are not used to derive the *Overall rating*, offer additional, useful information.

Is the school improving academically? The *Trend* indicator

For all the indicators, the *Report Card* provides a number of years of data. Unlike a simple snapshot of one year's results, this historical record provides evidence of change (or lack of change) over time. However, it is often difficult to determine whether a school's performance is improving or deteriorating simply by scanning several years of data. To detect trends in the performance indicators more easily, we developed the *Trend* indicator. It uses statistical analysis to identify those dimensions of school performance in which there has likely been real change rather than a fluctuation in results caused by random occurrences. Since standardizing makes historical data more comparable, the standardized scores rather than raw data are used to determine the trends. Because calculation of trends is uncertain when only

a small number of data points are available, a trend is indicated only in those circumstances where five years of data are available and where it is determined to be statistically significant. In this context, "statistically significant" means that, nine times out of 10, the trend that is noted is real; that is, it would not have happened just by chance.

The student characteristics indicators

For each school, the *Report Card* notes the percentage of its students who are enrolled in English Language Learner (ELL) programs or French Immersion programs or who have certain identified special needs. As was noted in the Introduction, it is sometimes useful to compare a school's results to those of similar schools. These three indicators can be used to identify schools with similar student body characteristics. The Institute's school ranking website, <<http://www.compareschoolrankings.org>> makes identifying and comparing these similar schools easier.

Notes

- 1 See, for instance, Michael Rutter et al., *Fifteen Thousand Hours: Secondary Schools and Their Effects on Children* (Harvard University Press, 1979); Peter Mortimore et al., *School Matters: The Junior Years* (Open Books, 1988).
- 2 The Ministry of Education provides the average score received by the students at each school on tests in each subject, at each grade level, for each year. The Ministry also assigns ranges of these scores to three levels of achievement. The levels are described as: not yet meeting expectations, meeting expectations, and exceeding expectations. The expectations reflect the skills that each student is expected to acquire in the subject area and by the grade level when testing occurs.

All of the *Report Card's* indicators except Below expectations (%) and Tests not written (%) are calculated using these average scores. Below expectations (%) is calculated using the three levels of achievement.
- 3 For a discussion of gender-based differentials in academic achievement, see Peter Cowley and Stephen Easton, *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*, Public Policy Sources 22 (Vancouver, BC: The Fraser Institute, 1999).

Detailed school reports

How to read the tables

Use the sample table and the explanation of each line below to help you interpret the detailed results for individual schools. Families choosing a school for their students should seek to confirm the *Report Card*'s findings by visiting the school and interviewing teachers, school administrators, and other parents. More information regarding schools may be found at <<http://www.compareschoolrankings.org>>; on the British Columbia Ministry of Education's web site at <<http://www.bced.gov.bc.ca/reporting/welcome.php>> and on the web sites

of local school districts and schools.

Of course, a sound academic program should be complemented by effective programs in areas of school activity not measured by the *Report Card*.

IMPORTANT: In order to get the most from the *Report Card*, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

DISTRICT NAME									
School Name [Public]					Gr 4 Enrollment: 16				
B –	ELL (%): 0.0		Special needs (%): 6.3			French Imm (%): 0.0			
	Actual rating vs predicted based					2014-15	Last 5 Years		
C –	on parents' avg. inc. of \$ n/a: n/a					Rank:	297/944	458/757	
Academic Performance		2011	2012	2013	2014	2015	Trend		
D –	Gr 4 avg score: Reading	468	472	471	501	518	▲		
E –	Writing	545	619	534	627	635	—		
F –	Numeracy	458	468	447	522	546	▲		
G –	Gr 7 avg score: Reading	469	421	461	441	486	—		
H –	Writing	539	556	596	616	608	▲		
I –	Numeracy	442	378	412	428	454	—		
J –	Gr 7 gender gap: Reading	n/a	n/a	n/a	F 10	n/a	n/a		
K –	Numeracy	n/a	n/a	n/a	M 46	n/a	n/a		
L –	Below expectations (%)	22.2	30.6	28.4	13.4	14.3	—		
M –	Tests not written (%)	4.3	3.9	1.3	8.0	15.7	▼		
N –	Overall rating out of 10	5.3	4.7	5.0	6.4	6.7	▲		

A — Grade-4 enrollment

The number of students enrolled in grade 4 as of September 30, 2014. Indicator results for small schools tend to be more variable than do those for larger schools and caution should be used in interpreting the results for smaller schools.

B — ELL (%); Special needs (%); French Immersion (%)

These statistics report the percentage of the students who are English Language Learners; the percentage of students with special needs; and the percentage of students registered in French Immersion programs.

When you want to compare academic results, these statistics can be used to find other schools where the student body has similar characteristics.

C (left) — Actual rating vs predicted based on parents' average employment income

This statistic is not available this year.

C (right) — Rank

The school's overall academic rank in the province for 2014/2015 and for the most recent five years. The rankings show how the school has done academically compared to the other schools in the *Report Card*.

D through I — Gr 4 avg score and Gr 7 avg score

The Average score indicators show how well each school's students performed on the uniform FSA tests in reading, writing, and numeracy at the grade-4 and grade-7 levels. The value for each of these indicators is the average scaled score awarded to students from the school who wrote the test.

J and K — Gr 7 gender gap

The gender gap scores report the difference (in the average scaled scores) between girls and boys on the grade-7 reading and numeracy tests. Where the difference favours the girls the value is preceded by an *F*. Where boys are favoured, the value is preceded by an *M*. An *E* means that there is no difference between the girls and the boys on this measure. Smaller differences indicate that the school is doing a good job for all its students.

L — Below expectations (%)

The percentage of all the completed tests written by the school's students that did not meet provincial expectations. A low value for Below expectations indicates that the school ensures that most of its students are meeting or exceeding the expected level of performance for the grade.

M — Tests not written (%)

The percentage of the tests that could have been written by students but, for whatever reason, were not.

Participation in the [Foundation Skills Assessment](#) is a valuable part of the province's grade-4 and grade-7 instructional program. A low Tests not written percentage shows that the school community understands the benefits of full participation in the Foundation Skills Assessment.

N—Overall rating out of 10

The Overall rating out of 10 takes into account the ten indicators described in rows D through M above to answer the question, "In general, compared to other schools in the *Report Card*, how is the school doing academically?"

O—Trends

An upward pointing arrow at the end of an indicator row means that the school is probably improving on that indicator; a downward pointing arrow means that the school is probably getting worse. The researchers had to be at least 90% sure that the changes were not just random before rating an indicator as improving or getting worse. A dash (—) indicates that there is no significant change; "n/a" indicates that there was insufficient data available with which to calculate a trend. The measurement of trends is based on the most recent five years of data.

Other notes

Note 1

The tables showing the detailed school results are organized according to four geographic regions of the province as follows: the Lower Mainland, Vancouver Island and the Coast, the Fraser Valley and Southern British Columbia, and the Interior and Northern British Columbia. Within each geographic region, school districts are grouped alphabetically. Finally, within each school district, both public and independent (private) schools are listed alphabetically. To find a school's results, find its city or town in the *List of cities and school districts* and note the school district in which the city is located. Find that page upon which each school district's results begin by referring to the *Index of school districts*.

Note 2

Not all the province's elementary schools are included in the tables or the ranking. Of all the schools in the province reporting FSA results, 944 are included in this *Report Card*. Excluded are schools at which fewer than 10 students were enrolled in grade 4. Also excluded are Type-1 schools at which fewer than 10 students were enrolled in grade 7 and Type-2 schools for which insufficient grade-7 data were available. (A description of Type-1 and Type-2 schools is provided in the section, "Elementary schools included in this report.") Type 2 schools are identified in the detailed school reports and in the ranking table with double daggers (††) immediately following each Type 2 school's name. Finally, schools of both types that did not generate a sufficiently large set of student results data to enable the calculation of an Overall rating out of 10 for the school year 2014/2015 were excluded.

The exclusion of a school from the *Report Card* should not be considered a judgment of the school's effectiveness.

Note 3

Due to continuing improvements in methodology, some historical values for indicators and overall ratings may differ from those previously reported.

Note 4

For more information on these schools and to easily compare their results, please visit the Fraser Institute's [school rankings web site](#).

Note 5

Where there were insufficient data available with which to calculate an indicator or where a school was not in operation during a specific year, "n/a" appears in the tables.

Note 6

You can compare a school's results with the all-schools' average results in the table below.

Note 7

If you have questions about the *Report Card*, contact Peter Cowley at peter.cowley@fraserinstitute.org.

Average values for all schools 2014/2015				Gr 4 enrollment: 41			
ELL (%): 14.8		Special Needs (%): 7.1		French Immersion (%): 8.1			
Parents' avg income: \$ n/a							
Academic Performance		2011	2012	2013	2014	2015	Trend
Gr 4 avg score:	Reading	490	490	496	491	491	—
	Writing	583	582	584	569	582	—
	Numeracy	493	496	490	489	487	▼
Gr 7 avg score:	Reading	494	492	493	495	494	—
	Writing	600	594	586	578	590	—
	Numeracy	482	476	481	479	476	—
Gr 7 gender gap:	Reading*	31.0	31.1	28.6	30.3	26.8	—
	Numeracy*	26.7	27.9	28.9	28.7	28.8	▼
Below expectations (%)		18.4	19.0	19.1	20.0	19.8	▼
Tests not written (%)		12.9	12.8	12.7	13.0	15.7	—
Overall rating out of 10		6.0	6.0	6.0	6.0	6.0	n/a

* These results reflect the average size of the grade 7 gender gaps in 2014/2015. The Reading gender gap favoured females at 62.7% of schools, males at 36.7% of schools, and was even at 0.6% of schools. The Math gender gap favoured females at 36.7% of schools, males at 62.1% of schools, and was even at 1.2% schools.

How does your school stack up?

Important Notes to the Rankings

In this table, schools are ranked (on the left hand side of the page) in descending order (from 1 to 939) according to their academic performance as measured by the Overall rating (shown on the right hand side of the table) for the school year 2014/2015. Each school's five-year average ranking and Overall rating are also listed. The higher the Overall school rating (out of 10), the higher the rank awarded to the school. Where schools tied in the Overall rating, they were awarded the same rank. Where fewer than five years of data were available "n/a" appears in the table.

Not all the province's elementary schools are included in the tables or the ranking. Of all the schools in the province reporting FSA results, 944 are included in this Report Card. Included are schools that enrolled at least 10 students in both grade 4 and grade 7. Also included are eligible schools (noted in

this table with a double dagger (††) whose students advanced to a middle school after grade 5 or grade 6 (see Key academic indicators of school performance section in the text). Excluded are those schools that did not generate a sufficiently large set of student data to enable the calculation of an Overall school rating for the school year 2014/2015.

The exclusion of a school from the Report Card should in no way be construed as a judgement of the school's effectiveness.

IMPORTANT: In order to get the most from the Report Card, readers should consult the complete table of results for each school of interest. By considering several years of results—rather than just a school's rank in the most recent year—readers can get a better idea of how the school is likely to perform in the future.

Appendix: Calculating the Overall rating out of 10

The Overall rating out of 10 is intended to answer the question, “In general, how is the school doing academically compared to other schools in the *Report Card*?” The following is a simplified description of the procedure used to convert the data received from the ministry of education into the Overall rating.

- 1 Subject by subject, the average scaled Foundation Skills Assessments (FSA) test scores for each school were standardized by calculating Z , which is defined by:

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 2 These six standardized scores were then combined and re-standardized.
- 3 The gender gap scores in grade-7 reading and grade-7 numeracy were each determined by calculating the absolute value of the difference between the average score for girls and the average score for boys. The results for each subject were then standardized as were the Below expectations and Tests not written values.
- 4 The five resulting standardized scores were then combined to produce a weighted average summary standardized score for the school. The weights used in making this calculation were: average scores for the six tests combined—45%; gender-gap scores for each of the grade-7 reading and grade-7 numeracy tests—10%; Tests not written—10%; and, percentage of tests Below expectations—25%.

For schools for which there were no gender-gap results, the combined average scores for the six tests was given a weight of 45%; Tests not written was weighted at 20%; and the percentage of tests Below expectations was weighted at 35%.

- 5 This summary standardized score was re-standardized.

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 6 The allowable maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or greater than, 2.2 receive an overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers, a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 7 The resulting standardized scores were converted into overall ratings according to the formula:

$$OR = \mu + (\sigma * \text{StanScore})$$

where OR is the resulting Overall rating, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and StanScore is the standardized score calculated in (4) above and adjusted as required for minimum and maximum values as noted in (6) above. As noted in (6) above, OR_{\min} equals zero, Z_{\min} equals -3.29 ; and Z_{\max} equals 2.2 .

- 8 Finally, the derived overall rating is rounded to one place of the decimal to reflect the significant number of places of the decimal in the original raw data.

Note that the Overall rating out of 10, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its overall rating, it must improve more than the average. If it improves, but to an extent less than the average, it will show a decline in its rating.

About the authors

Peter Cowley

Peter Cowley is the Vice President, Strategic Initiatives and Director of School Performance Studies at the Fraser Institute. He graduated from the University of British Columbia with a B.Comm. in 1974. Shortly thereafter, he began a long career in marketing and general management in several sectors. During his assignments in general management, process improvement was a special focus and interest. In 1994, Mr Cowley independently wrote and published *The Parent's Guide*, a popular handbook for parents of British Columbia's secondary-school students. *The Parent's Guide* web site replaced the handbook in 1995. In 1998, Mr Cowley was co-author of the Fraser Institute's *A Secondary Schools Report Card for British Columbia*, the first of the Institute's continuing series of annual reports on school performance. This was followed by *The 1999 Report Card on British Columbia's Secondary Schools, Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools*, and *The 1999 Report Card on Alberta's High Schools*. Since then, Mr Cowley has co-authored all of the Institute's annual *Report Cards*. Annual editions now include *Report Cards* on elementary and secondary schools in British Columbia, Alberta and Ontario as well as a report on secondary schools in Quebec.

Stephen T. Easton

Stephen T. Easton is a professor of economics and an associate of both the School of Criminology and the School for International Studies at Simon Fraser University and a Senior Fellow at the Fraser Institute. He received his A.B. from Oberlin College and his Ph.D. from the University of Chicago. He is a member of the Institute for Canadian Urban Research Studies (ICURS) and has written over 160 scientific papers, policy documents, articles, monographs and books.

Recent works published by the Fraser Institute include *Marijuana Growth in British Columbia* (2004), and *Cost of Crime in Canada: 2014 Report* (with Paul Brantingham and Hilary Furness, 2014). A co-author of *A Secondary Schools Report Card for British Columbia* (1998), *Boys, Girls, and Grades: Academic Gender Balance in British Columbia's Secondary Schools* (1999) and the *Report Card on Aboriginal Education in British Columbia* (2004), he has continued to co-author the *Report Cards* of British Columbia, Alberta, New Brunswick and, most recently, Ontario. Other publications about education include "Do We Have a Problem Yet? Women and Men in Higher Education," in David Laidler (ed.), *Renovating the Ivory Tower: Canadian Universities and the Knowledge Economy* (C.D. Howe Institute, 2002), pp. 60–79; "Plus ça change, plus c'est la même chose" in Stephen B. Lawton, Rodney Reed, and Fons van Wieringen, *Restructuring Public Schooling* (Springer-Verlag, 1997) and *Education in Canada: An Analysis of Elementary, Secondary and Vocational Schooling* (Fraser Institute, 1988). His most recent book, *The Run to the Pennant: A Multiple Equilibria Approach to Professional Sports Leagues* (Springer, 2014), with Duane W. Rockerbie indicates more about the breadth of his interests.

His editorials have been carried by the *Vancouver Sun*, *Globe and Mail*, *National Post*, *Ottawa Citizen*, Stirling chain and many other newspapers around the country. Professor Easton has been an associate editor of *Economic Inquiry*, a member the Board of Editors of the *Canadian Journal of Economics*, and an organizer of the France-Canada Roundtable.

Publishing information

Distribution

These publications are available from <<http://www.fraserinstitute.org>> in Portable Document Format (PDF) and can be read with Adobe Acrobat® 7 or Adobe Reader®, versions 7 or later. Adobe Reader® DC, the most recent version, is available free of charge from Adobe Systems Inc. at <<http://get.adobe.com/reader/>>. Readers who have trouble viewing or printing our PDF files using applications from other manufacturers (e.g., Apple's Preview) should use Reader® or Acrobat®.

Purpose, funding, & independence

The Fraser Institute provides a useful public service. We report objective information about the economic and social effects of current public policies, and we offer evidence-based research and education about policy options that can improve the quality of life.

The Institute is a non-profit organization. Our activities are funded by charitable donations, unrestricted grants, ticket sales, and sponsorships from events, the licensing of products for public distribution, and the sale of publications.

All research is subject to rigorous review by external experts, and is conducted and published separately from the Institute's Board of Directors and its donors.

The opinions expressed by the authors are those of the individuals themselves, and do not necessarily reflect those of the Institute, its Board of Directors, its donors and supporters, or its staff. This publication in no way implies that the Fraser Institute, its directors, or staff are in favour of, or oppose the passage of, any bill; or that they support or oppose any particular political party or candidate.

As a healthy part of public discussion among fellow citizens who desire to improve the lives of people through better public policy, the Institute welcomes evidence-focused scrutiny of the research we publish, including verification of data sources, replication of analytical methods, and intelligent debate about the practical effects of policy recommendations.

About the Fraser Institute

Our mission is to improve the quality of life for Canadians, their families and future generations by studying, measuring and broadly communicating the effects of government policies, entrepreneurship and choice on their well-being.

Notre mission consiste à améliorer la qualité de vie des Canadiens et des générations à venir en étudiant, en mesurant et en diffusant les effets des politiques gouvernementales, de l'entrepreneuriat et des choix sur leur bien-être.

Peer review—validating the accuracy of our research

The Fraser Institute maintains a rigorous peer review process for its research. New research, major research projects, and substantively modified research conducted by the Fraser Institute are reviewed by a minimum of one internal expert and two external experts. Reviewers are expected to have a recognized expertise in the topic area being addressed. Whenever possible, external review is a blind process.

Commentaries and conference papers are reviewed by internal experts. Updates to previously reviewed research or new editions of previously reviewed

research are not reviewed unless the update includes substantive or material changes in the methodology.

The review process is overseen by the directors of the Institute's research departments who are responsible for ensuring all research published by the Institute passes through the appropriate peer review. If a dispute about the recommendations of the reviewers should arise during the Institute's peer review process, the Institute has an Editorial Advisory Board, a panel of scholars from Canada, the United States, and Europe to whom it can turn for help in resolving the dispute.
