The Economic Way of Thinking

"Dr. Ninos Malek (facilitator) loves life and as a result engages us all."

Building on basic economic principles such as incentives and supply and demand, The Economic Way of Thinking offers a look into the everyday application of economics. Teachers are led through valuable lesson concepts that include the tools, activities and resources necessary to cover more advanced topics such as marginal analysis, price discrimination, and public choice theory in ways that all levels of students will find engaging and easy to understand.

Calgary, AB Delta Calgary Downtown
Friday, March 10, 2017 209- Fourth Avenue S.E
